**Spotlight Strategy: Deliver Personalized Student Support and Guidance**

***Somerset County Technology Center***

The administrators at Somerset County Technology Center (SCTC) believe that success is directly related to student and staff expectations. In order to set clear expectations and provide guidance to students while they choose a program, SCTC offers the Career Pathways Book, a unique resource that provides a comprehensive look at each of the 17 programs at SCTC as well as local workforce data and details regarding postsecondary articulation. The materials also include detailed shop profiles and NOCTI Blueprint information.

According to Administrative Director Georgia Yeager, this resource is a valuable tool for students and parents, as well as sending-school guidance counselors, transition coordinators and special education instructors. She explained, "It goes beyond the typical program of studies book used for course selection. This book clearly defines program expectations and allows students to preview the types of skills necessary to succeed. SCTC's goal is to ensure students know what is expected of them upon enrollment and so that they have, at a minimum, a reasonable chance of success."

The Career Pathway Book is also an important resource for special needs students. Because program expectations are clearly defined along with a program profile, students with special needs are able to self-evaluate and determine whether or not a program is right for them. The admissions policy in the book was designed with the help of local special education coordinators.

Somerset County Technology Center is located in Somerset, Pennsylvania. As a part-time career and technology center, it enrolls approximately 395 students in grades 10 through 12 and offers 17 career and technical education programs. SCTC serves eight school districts, and students from these districts attend SCTC at no cost. An additional district may send students on a tuition basis.
