CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

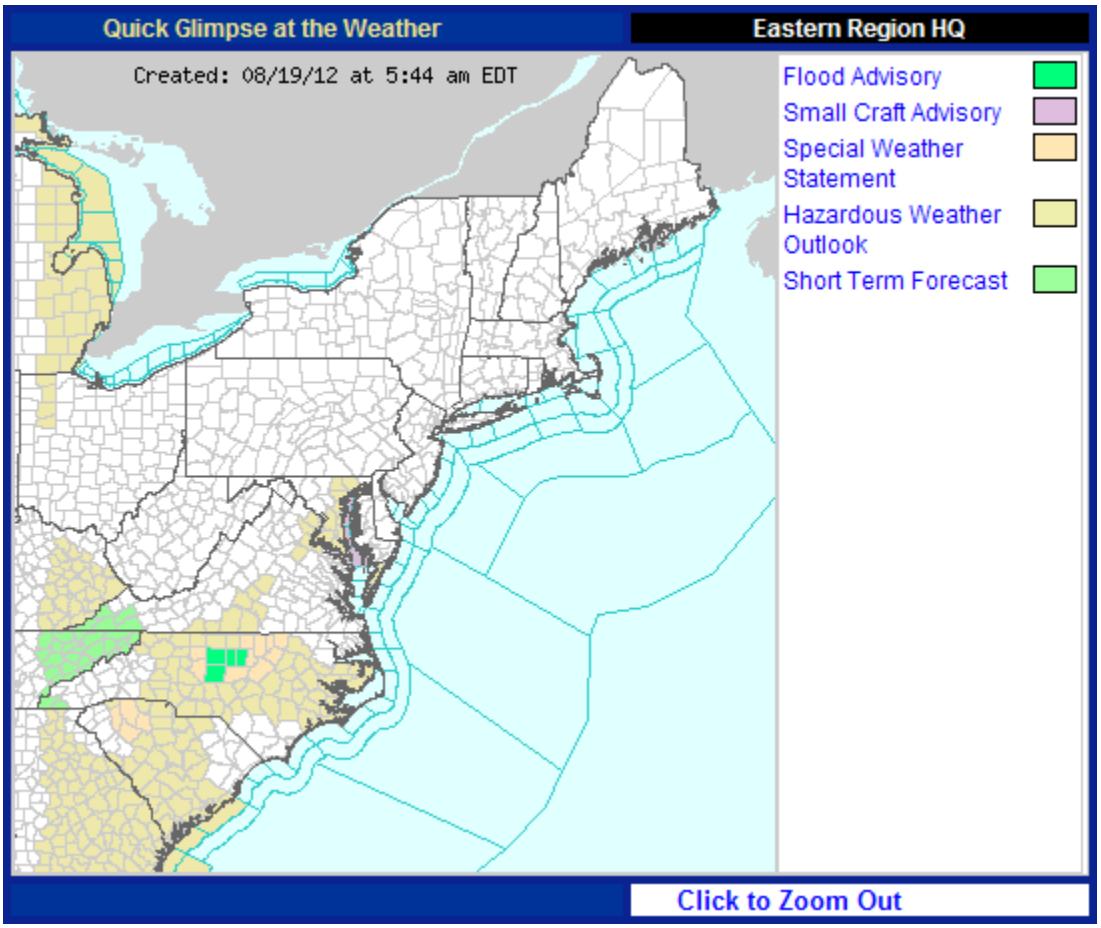
National Weather Service, 4:54 a.m., 8/19/12

An upper level disturbance lifting northward from the central Appalachians will bring a chance of showers and thunderstorms to western and central Pennsylvania from late this morning through the afternoon. High temperatures will range from the low 70s across the northwest mountains and Laurel Highlands to the low 80s across the southeast piedmont.

A weak area of low pressure will track from the southeast states to the southern Delmarva region tonight into early Monday. This system will tap deep moisture along the coast and likely spread rainfall into southeastern Pennsylvania overnight. Low temperatures will vary from the low 50s in the northwest mountains to low 60s across the lower Delaware Valley.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 8/18/12:

Solar Activity Forecast: Solar activity is expected to be low with moderate activity likely for the next three days (19-21 August).

Geophysical Activity Forecast: The geomagnetic field is expected to be quiet to unsettled for the next three days (19-21 August) as a corotating interaction region and coronal hole high speed stream become geoeffective.
