West Virginia:	No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 5:30 a.m., 6/26/12

Abundant sunshine with comfortable humidity and below normal temperatures will blanket the region for much of today. Periods of cloudiness will develop across the region near and east of the Susquehanna Valley this afternoon into this evening. Northwest winds will increase to 10 to 20 mph for the late morning and afternoon hours and will gust between 25 and 30 mph at times.

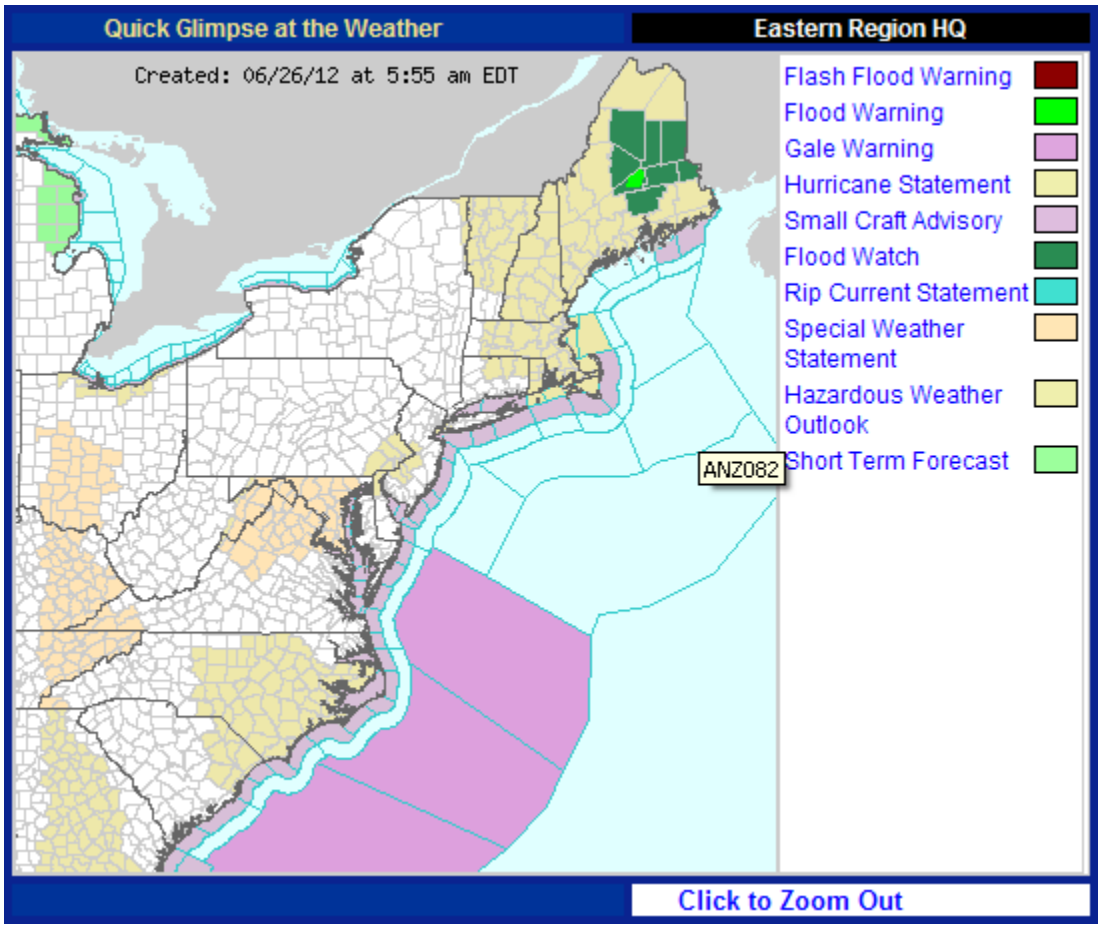
Mainly clear skies and cool conditions will occur once again tonight with temperatures falling to daybreak lows between 45 and 50 degrees across the mountains and in the mid 50s for most other locations.

A spectacular early summer day is shaping up for Wednesday with afternoon highs in the mid 70s to lower 80s, continued low relative humidity and a refreshing 10 to 20 mph breeze for the midday and afternoon hours.

Heat and humidity will ramp up for Thursday afternoon into Friday with scattered showers and thunderstorms beginning across the region Thursday night.

WATCHES AND WARNINGS:

None



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 6/25/12:

Solar Activity Forecast: Solar activity is expected to be very low during the period (26 - 28 June) with a chance for a C-class flare.

Geophysical Activity Forecast: The geomagnetic field is expected to be quiet during the period (26 - 28 June) with a chance for unsettled levels.
