APARTMENT BUILDING FIRE - City of Philadelphia, 6/26/12 - An apartment building fire occurred at 1811 Rhawn Street in the city of Philadelphia. Thirty persons were evacuated and a reception center was established at Rhawnhurst Elementary School; no injuries were reported. Officials worked with residents to retrieve essentials and medications. The Red Cross housed 2 families (4 adults) at the Red Cross House overnight. Other displaced occupants made accommodations with family or friends. Approximately 25 apartment units cannot be occupied. Approximately 25 units were able to be reoccupied for the night. The reception center at Rhawnhurst Elementary School was closed as of 1:26 a.m.

DISASTER DECLARATIONS:

None

CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 5:35 a.m., 6/27/12

Deep low pressure drifting east across Maine will combine with high pressure over the Midwest to bring us one more day of breezy conditions and comfortably low humidity.

The high temperature this afternoon will vary from the mid 70s across the northern and western mountains of Pennsylvania to the lower and mid 80s throughout the central and southern valleys.

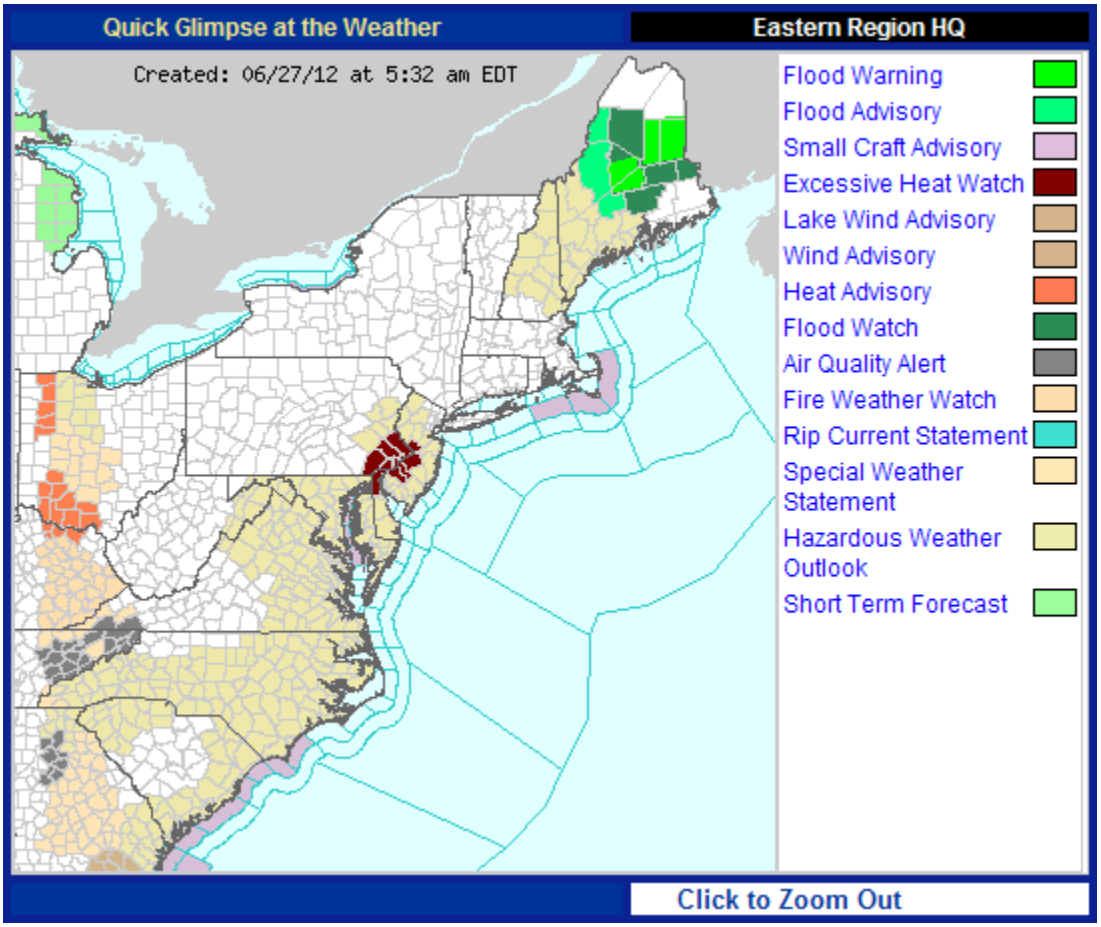
A ridge of high pressure building across the region tonight and Thursday will be accompanied by partly cloudy skies and lighter westerly winds. Lows tonight will range through the 50s.

High temperatures Thursday afternoon in the lower 80s across the northern mountains and mid to upper 80s elsewhere, will be 3 to 5 degrees above normal for late June.

Increasing heat and humidity will push east from the Ohio Valley and overspread all of central Pennsylvania Friday through Sunday.

WATCHES AND WARNINGS:

None



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 6/26/12:

Solar Activity Forecast: Solar activity is expected to be low through the period (27 - 29 June).

Geophysical Activity Forecast: The geomagnetic field is expected to be at mostly quiet levels during days 1 - 2 (27 - 28 June). Field activity is expected to increase to quiet to unsettled levels on day 3 (29 June) with a chance for active levels due to the arrival of a co-rotating interaction region in advance of a coronal hole high-speed stream.
