CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: **Full Activation.**
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: **Full Activation.**

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 4:48 a.m., 7/3/12

High pressure will maintain fair weather in Pennsylvania today. Mainly clear skies will allow for another warm day. A warm front will move across the state from the southwest as the high pressure weakens this evening. This front will bring the chance of showers and thunderstorms tonight and through Wednesday. Independence day will be very warm with highs in the upper 80s to the low 90s and humid with a chance of mainly afternoon and evening showers and thunderstorms.

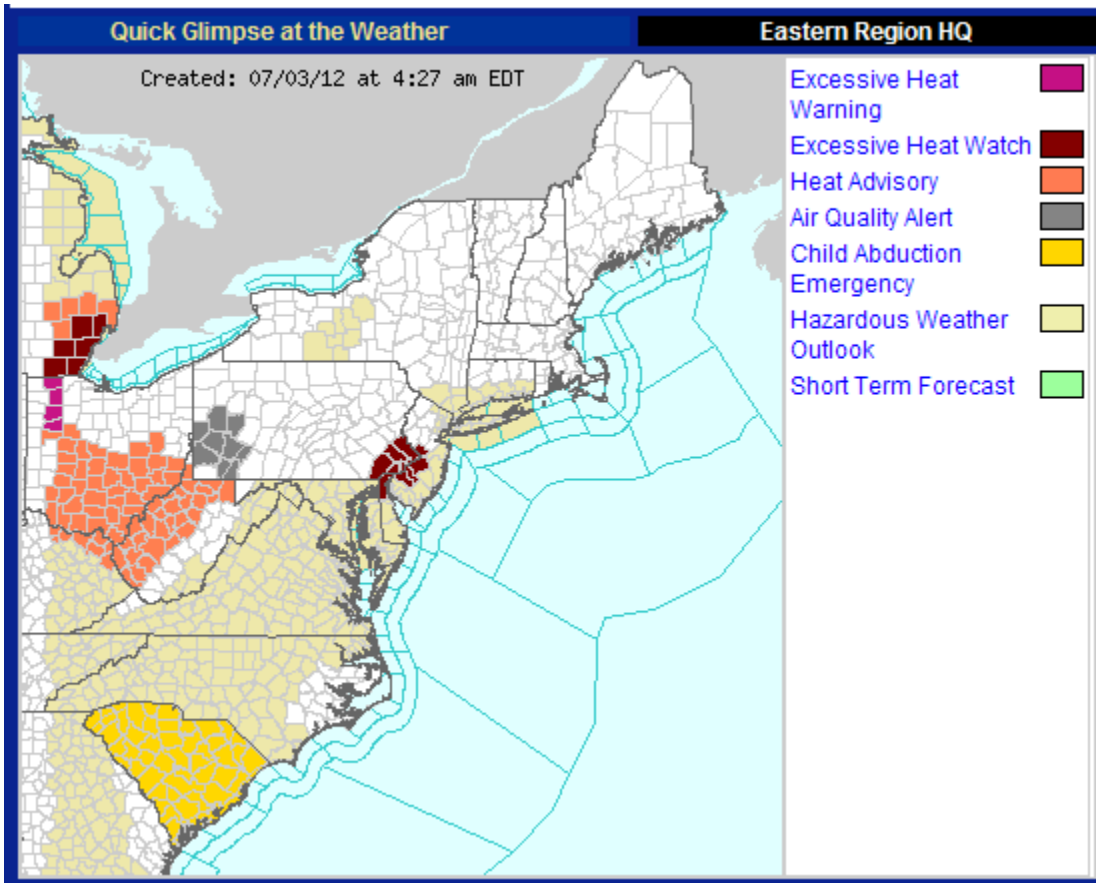
The high temperature today will be in the upper 80s and lower 90s statewide. Lows this evening will be in the upper 60s to low 70s.

WATCHES AND WARNINGS:

Excessive Heat Watch
Issued: July 03 at 3:47AM EDT
Expiring: July 05 at 6:00PM EDT

Urgency: Future
Status: Actual

Areas affected: Bucks; Chester; Delaware; Montgomery; Philadelphia



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 7/2/12:

Solar Activity Forecast: Solar activity is expected to be moderate during the period (03 - 05 July) with M-class flares expected from Regions 1513 and 1515.

Geophysical Activity Forecast: Geomagnetic field activity is expected to remain at unsettled to active levels on day 1 (02 July) as CH HSS effects persist. Activity is expected to decrease to quiet to unsettled levels during days 2 - 3 (04 - 05 July) as CH HSS effects gradually subside. The CME associated with today's M5/2b flare is not expected to disturb the field during the forecast period.
