WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 5:35 a.m., 7/4/12

Showers and thunderstorms continue across the southern most tier of Pennsylvania early this morning. These storms will move to the southeast exiting the region by 8 am.

Today will be very warm and humid with another round of showers and thunderstorms possible this afternoon and evening. These showers and thunderstorms will move quickly through by mid evening. Expect hot humid weather to prevail into the weekend especially in southeastern Pennsylvania. Saturday afternoon evening should provide for another chance for showers and thunderstorms.

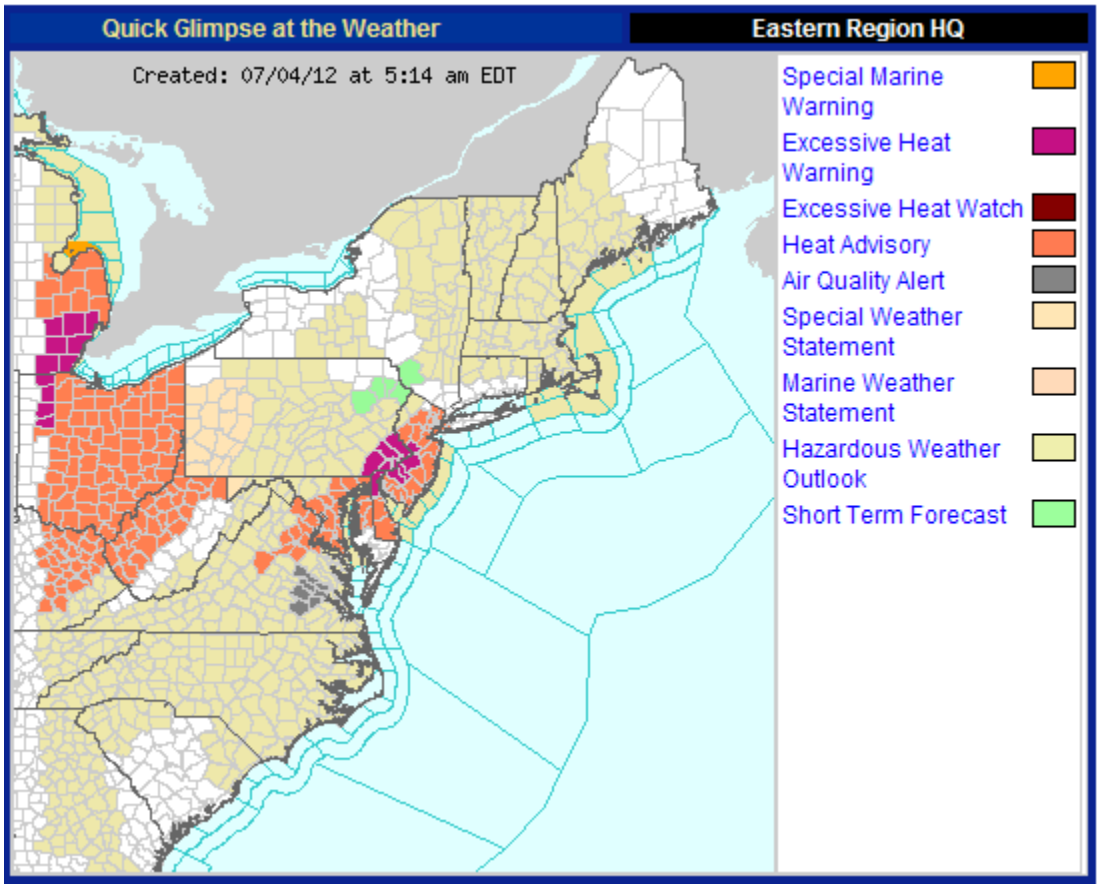
Highs today will range from the upper 80s along the north and low to mid 90s across the rest if the Commonwealth. Lows this evening will range from the mid 60s in the north to the low 70s in the south.

WATCHES AND WARNINGS:

Excessive Heat Watch
Issued: July 03 at 3:47AM EDT
Expiring: July 05 at 6:00PM EDT

Urgency: Future
Status: Actual

Areas affected: Bucks; Chester; Delaware; Montgomery; Philadelphia



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 7/3/12:

Solar Activity Forecast: Solar activity is expected to be moderate through the period (04 - 06 July) with more M-class flares expected from Region 1515.

Geophysical Activity Forecast: Geomagnetic field activity is expected to be at quiet to unsettled levels through the period (04 - 06 July) with a chance for active levels due to persistent CH HSS effects. Recent CME activity from Region 1515 is not expected to significantly disturb the geomagnetic field.
