WEATHER:

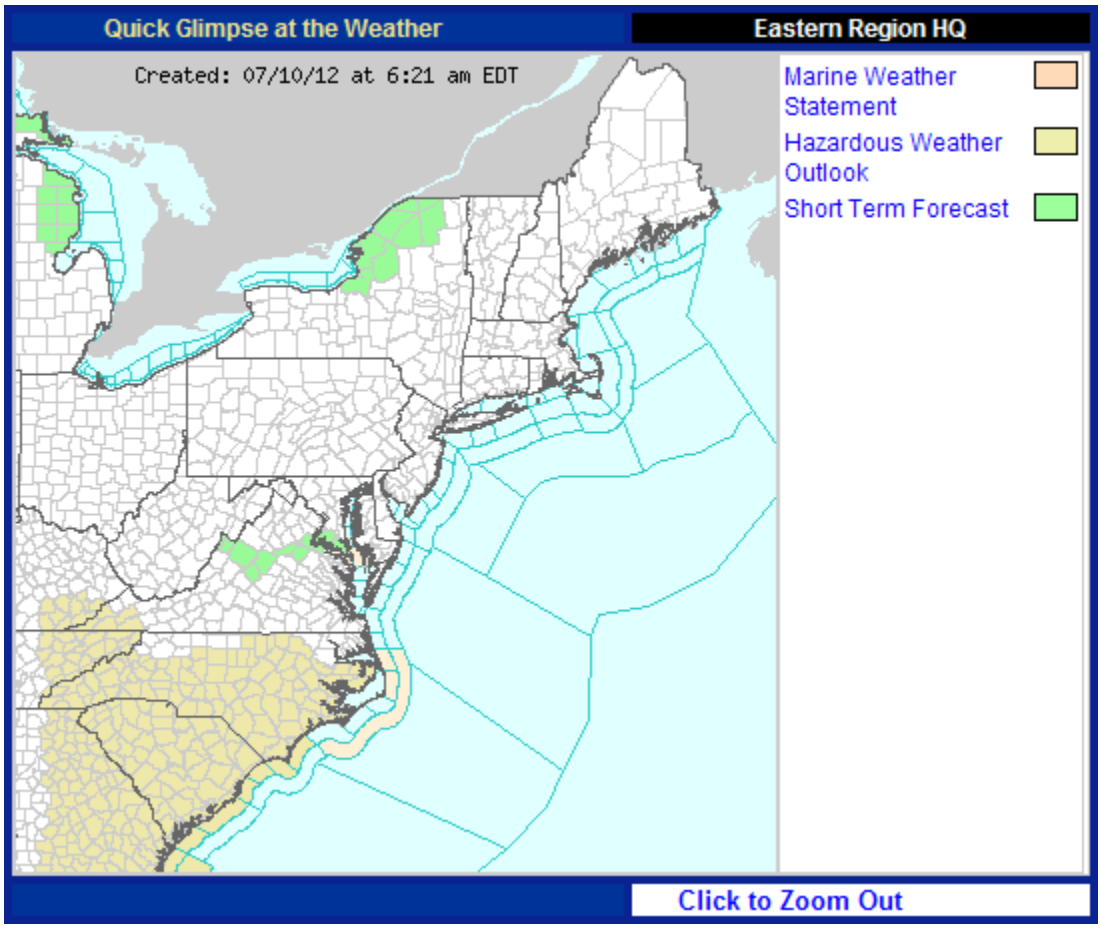
24-hour Projected Weather Statewide:

National Weather Service, 6:14 a.m., 7/10/12

Today will feature partly to mostly sunny skies across the Commonwealth with a low chance for an isolated shower or thunderstorm, mainly over the southeastern part of the state. High temperatures will range from the upper 70s across the highest terrain of northern and western Pennsylvania to the middle and upper 80s in the larger metropolitan areas in the southeast. High pressure will overspread northern Pennsylvania tonight with chilly readings dropping into the upper 40s and low 50s. Low temperatures will range from the upper 50s to low 60s in the central and southern parts of the state.

WATCHES AND WARNINGS:

None



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 7/9/12:

Solar Activity Forecast: Solar activity is expected to be moderate with a chance for X-class events for the next three days (10 - 12 July).

Geophysical Activity Forecast: The geomagnetic field is expected to be at mostly quiet to unsettled levels with isolated active periods on day one (10 July) due to possible weak effects from the 06 July CME. A return to mostly quiet conditions is expected for days two and three (11 - 12 July).
