None

CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 4:50 a.m., 7/11/12

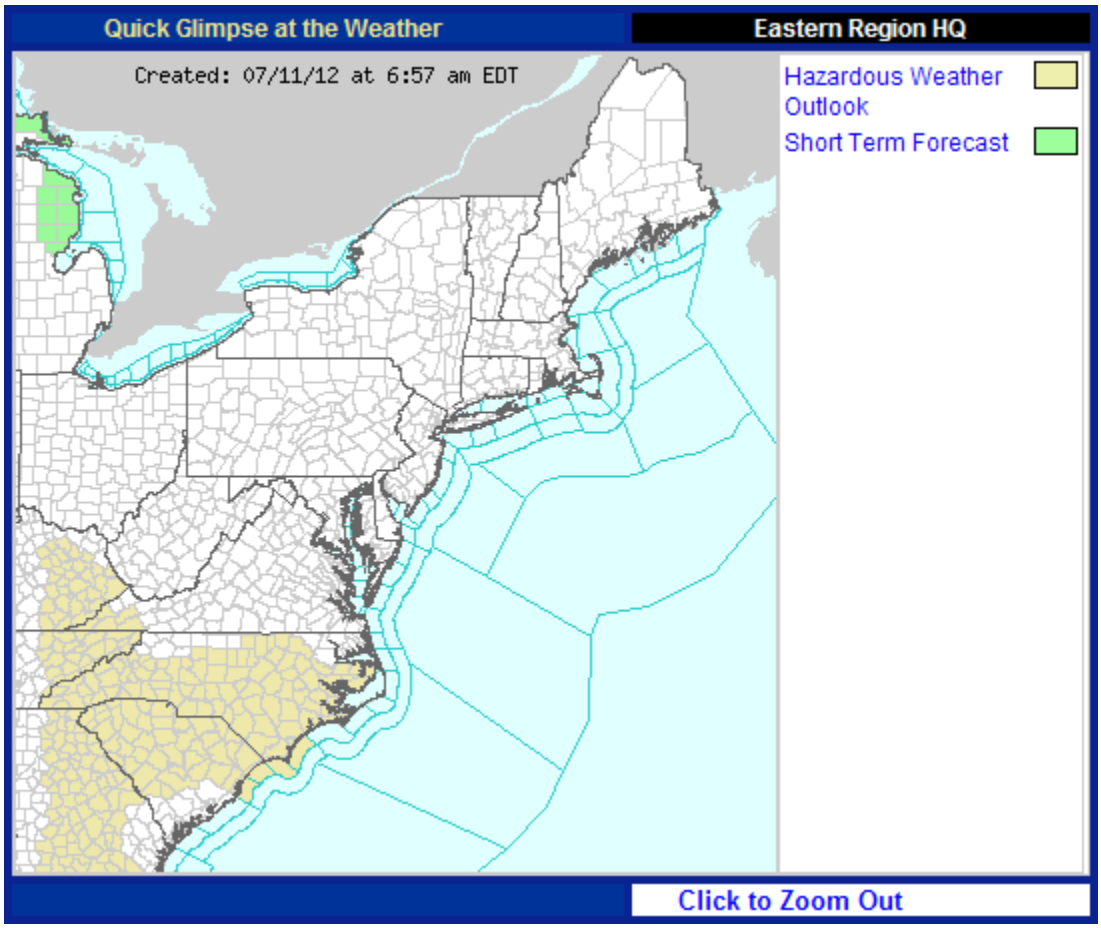
High pressure over the Great Lakes will slide east to the New England coast by Friday. This will bring fair weather and seasonably warm temperatures to Pennsylvania through the rest of the work week.

An isolated, late day shower or thunderstorm is possible each of the next several days, but most areas will remain dry. An increased chance for more widespread showers and thunderstorms will arrive this weekend as a warm front moves northward through the state.

High temperatures this afternoon will range from the upper 80s near Philadelphia and Pittsburgh to the lower 80s across the northern mountains. Low temperatures Thursday morning will vary from the mid 50s in the northern Poconos to the upper 60s in Philadelphia.

WATCHES AND WARNINGS:

None



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 7/10/12:

Solar Activity Forecast: Solar activity is expected to be moderate with a slight chance for X-class events for the next three days (11 - 13 July).

Geophysical Activity Forecast: The geomagnetic field is expected to be at mostly quiet to unsettled levels for the next three days (11 - 13 July).
