CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 5:48 a.m., 7/12/12

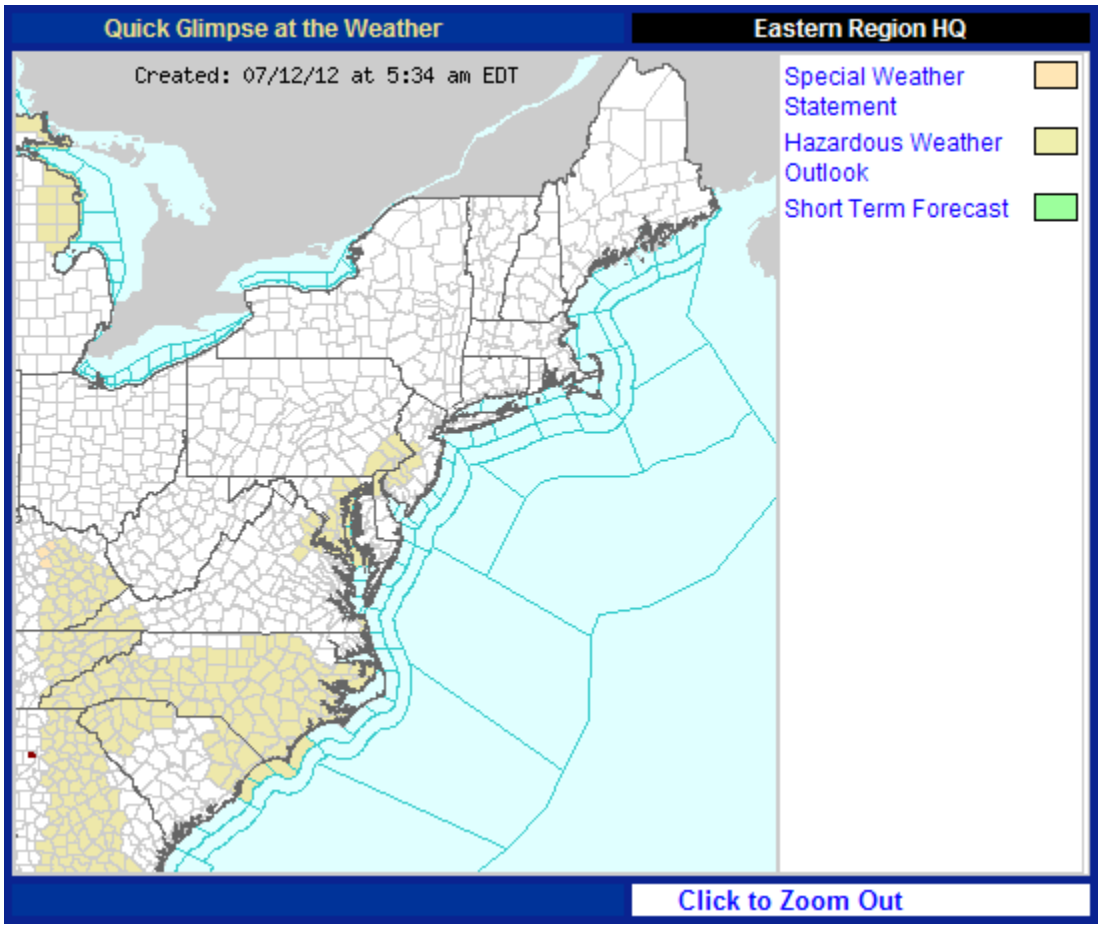
A ridge of high pressure across eastern Pennsylvania will provide mostly sunny and warm conditions today for most of the state. However, an afternoon thunderstorm is possible in a few spots across western Pennsylvania. High temperatures will range from the low 80s over the highest terrain of the Alleghenies to around 90 across the southeast piedmont.

Tonight should be dry and tranquil as high pressure remains over the state. Lows will be in the 60s.

An approaching warm front will bring increasing clouds across southern Pennsylvania on Friday along with the chance of a shower or thunderstorm toward evening. Highs Friday will range from the upper 70s over the Laurel Highlands to the low 90s in the lower Delaware Valley.

WATCHES AND WARNINGS:

None



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 7/11/12:

Solar Activity Forecast: Solar activity is expected to be moderate with a slight chance for X-class events for the next three days (12 - 14 July).

Geophysical Activity Forecast: The geomagnetic field is expected to be at mostly quiet to unsettled levels for the next three days (12 - 14 July).
