CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 5:40 a.m., 7/13/12

A relatively thick layer of mid and high clouds will blanket much of the Keystone State today greatly dimming the sun at times.

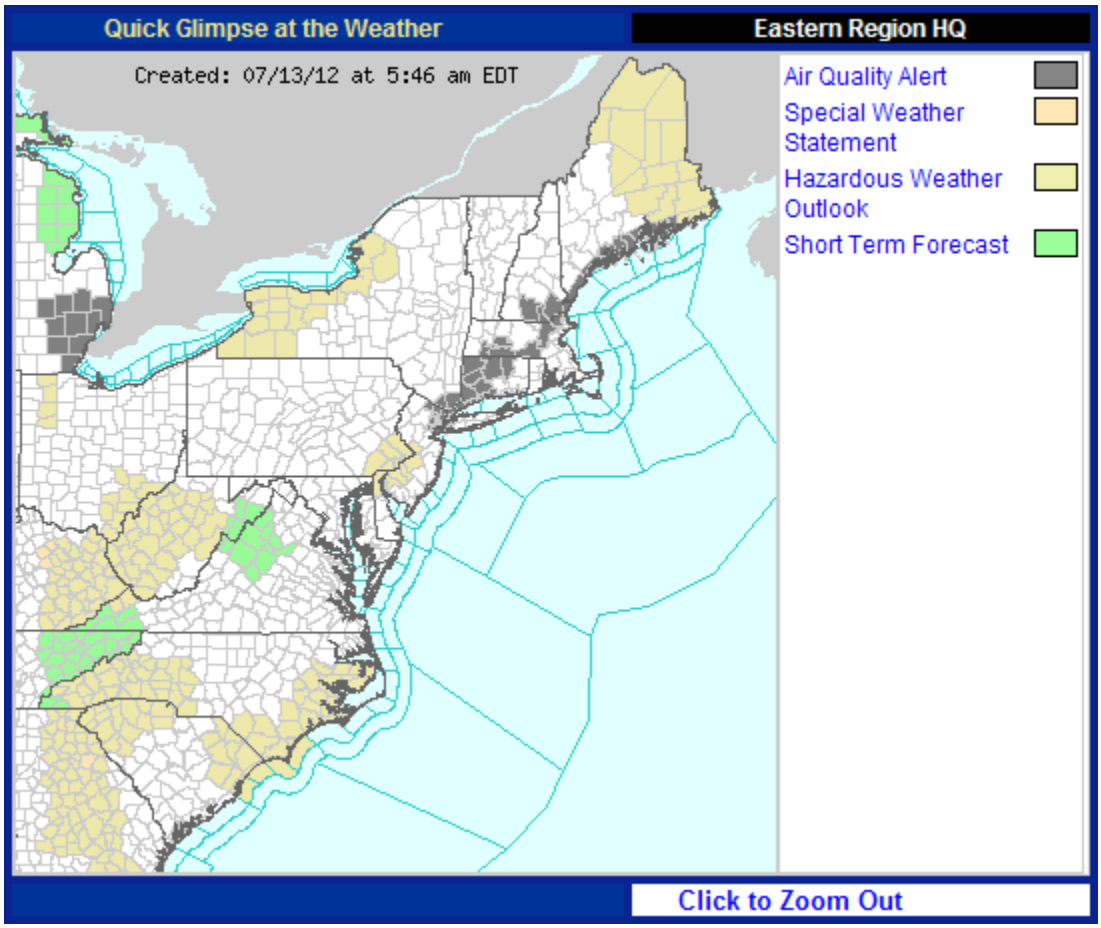
There is a chance for late afternoon showers or a thunderstorm but that will be confined mainly to the Laurel Highlands. High temperatures this afternoon will vary from the lower to mid 70s across the Laurels to the mid 80s throughout the Susquehanna Valley.

Warmer and more humid air will push northeast across the Commonwealth later today and tonight bringing a likelihood of showers and thunderstorms across central Pennsylvania and surrounding areas this weekend.

The high temperature this afternoon will vary from the lower and mid 70s across the Laurel Highlands to around 90 degrees in the lower Delaware Valley.

WATCHES AND WARNINGS:

None



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 7/12/12:

Solar Activity Forecast: Solar activity is expected to be moderate with a chance for X-class events for the next three days (13 - 15 July).

Geophysical Activity Forecast: The geomagnetic field is expected to be at mostly quiet to unsettled levels for day one (13 July). Unsettled to active levels, with isolated minor storm intervals, are expected on days two and three (14 - 15 July) as effects from the 12 July CME are expected to become geoeffective.
