Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 5:40 a.m., 7/14/12

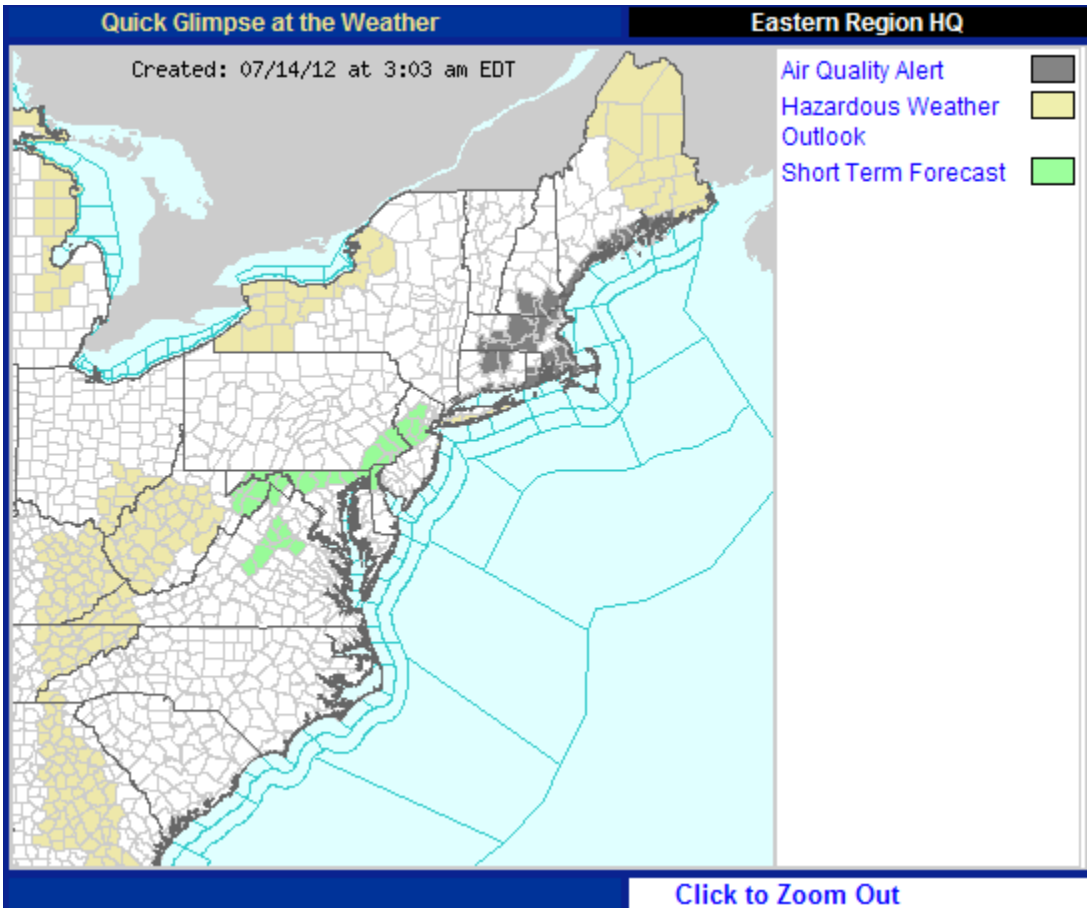
A warm and moist south to southwesterly flow will combine with an approaching trough of low pressure to bring an increasing chance of showers and scattered afternoon thunderstorms today and Sunday. Drier air will push into the region for Monday and Tuesday but it will turn hot and humid.

High temperatures this afternoon will vary from the upper 70s in the Alleghenies to around 90 degrees in the Philadelphia metro area.

Tonight will become rather muggy with lows temperatures in the mid 60s across the mountains and around 70 degrees throughout the Susquehanna River Valley.

WATCHES AND WARNINGS:

Excessive Heat Watch **Issued: July 14 at 3:39AM EDT** **Expiring: July 18 at 9:00PM EDT**	**Urgency:** Future **Status:** Actual
Areas affected: Bucks; Chester; Delaware; Montgomery; Philadelphia	



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 7/13/12:

Solar Activity Forecast: Solar activity is expected to be at low to moderate levels for the next three days (14-16 July), as Regions 1520 and 1521 continue to evolve and rotate toward the west limb.

Geophysical Activity Forecast: The geomagnetic field is expected to be at quiet to minor storm levels with a slight chance for isolated periods at major storm levels on day one (14 July), due the arrival of the 12 July CME. Unsettled to active levels with a chance for minor storm periods are expected on day two (15 July), as effects of the CME continue. A return to predominantly quiet levels is expected on day three (16 July).
