Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 4:00 a.m., 7/21/12

A nearly stationary front just south of the Mason Dixon Line will keep unsettled conditions in the forecast through the weekend.

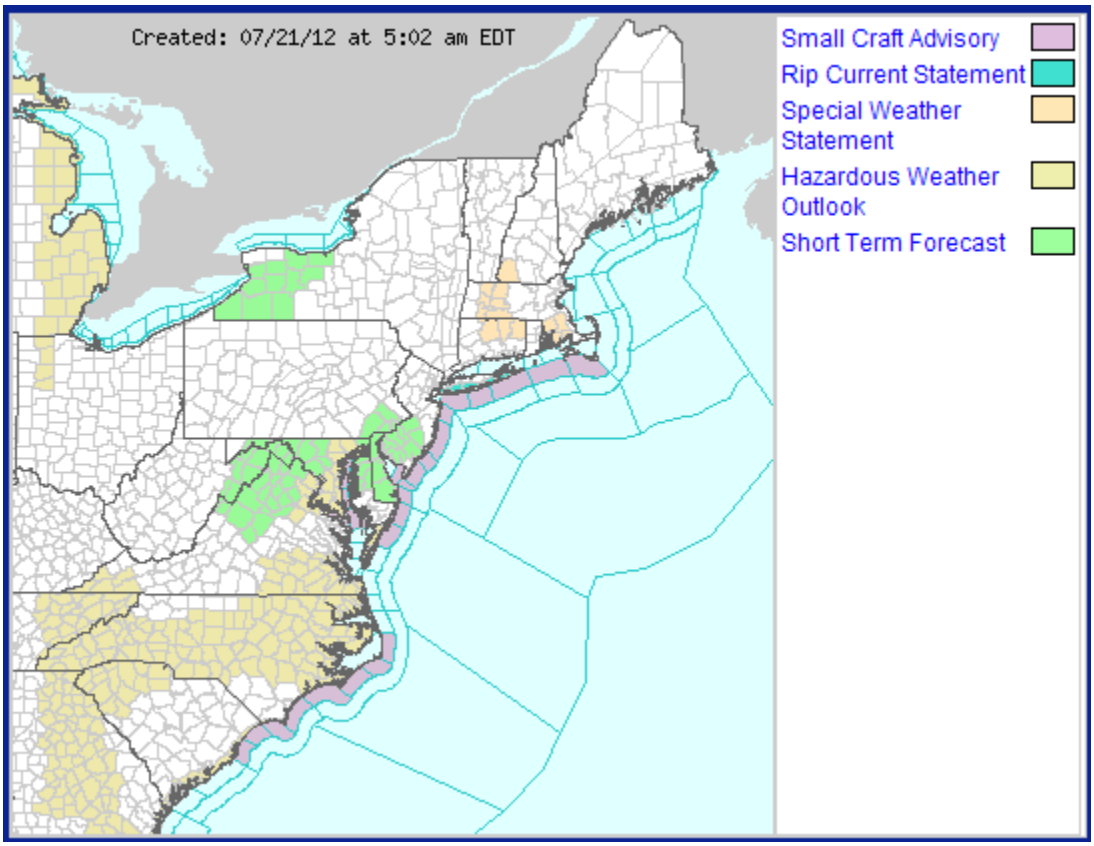
Today will be mostly cloudy and cooler than normal with a few showers or even some drizzle. Highs will only average in the 70s.

Some drying is likely overnight and it will be seasonably mild with lows from the mid 50s to mid 60s from north to south.

Sunday will see a mix of sun and clouds and stray shower or thunderstorm cannot be ruled out especially in the afternoon. It will be much warmer with highs returning to the mid to upper 80s.

WATCHES AND WARNINGS:

None



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 7/20/12:

Solar Activity Forecast: Solar activity is expected to be at very low levels with a chance for C-class flares for the next three days (21-23 July).

Geophysical Activity Forecast: The geomagnetic field is expected to be at mostly quiet levels on day one (21 July). Quiet to unsettled levels are expected on day two (22 July), as a coronal hole high speed stream (CH HSS) becomes geo effective. An increase to quiet to unsettled levels with a chance for active periods is expected on day three (23 July) as effects of the CH HSS continue.
