CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

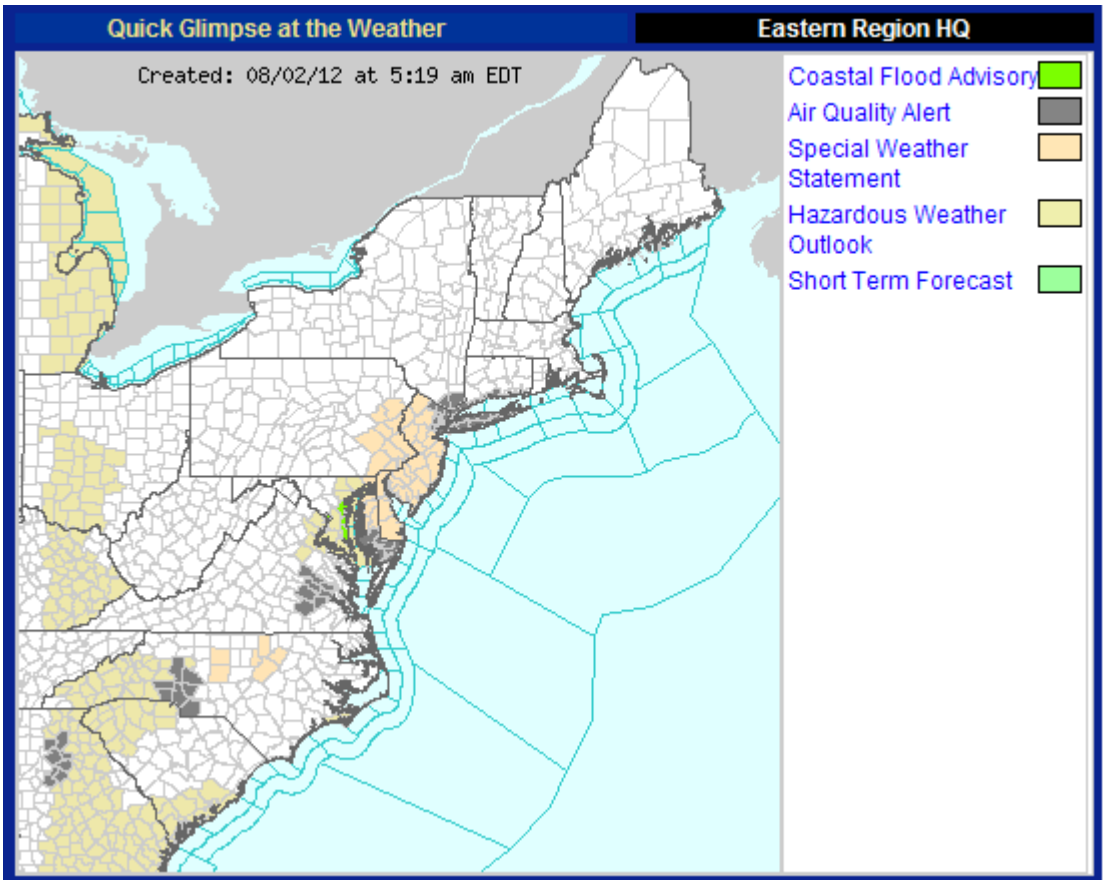
24-hour Projected Weather Statewide:

National Weather Service, 6:05 a.m., 8/2/12

High pressure building into the region today will result in clear to partly cloudy skies statewide. Patchy fog and low clouds will continue through the first half of this morning. It will clear by mid morning with clearing skies through the rest of the day as high pressure will dominate the weather today and Friday providing fair weather, warm temperatures and more comfortable humidity. Highs this afternoon will range from the lower 80s across the northwest mountains to near 90 across the southeast. Lows tonight will range from the low 60s in the northwest to the upper 60s in the southeast.

WATCHES AND WARNINGS:

There are no active watches, warnings or advisories.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 8/1/12:

Solar Activity Forecast: Solar activity is expected to continue at low levels with a chance for M-class flares.

Geophysical Activity Forecast: The geomagnetic field is expected to be quiet to unsettled with isolated active periods possible on day 1 (02 August) due to effects from the 28 July CME. Quiet to unsettled conditions are expected on day 2 (03 August). Mostly quiet conditions are expected on day 3 (04 August).
