CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

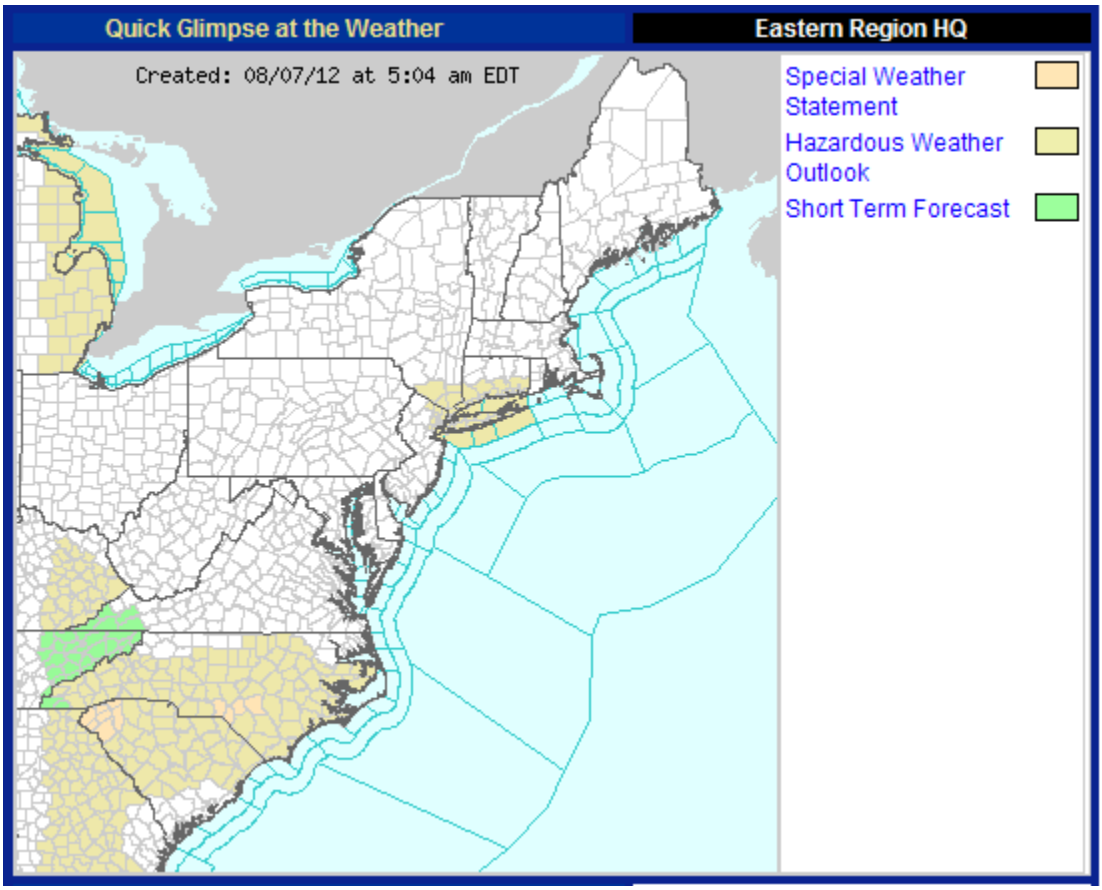
National Weather Service, 4:41a.m., 8/7/12

Fair weather will prevail in Pennsylvania through mid week. Expect patchy fog this morning especially in the valleys and river beds. This will dissipate by 9 a.m. As the week progresses so will humidity and the chance of showers and thunderstorms.

The highs today will range from the low 80s in the northwest to the upper 80s and low 90s in the southeast. Lows tonight will be tempered by a low cloud deck that should form over the southeast this evening. Lows will range from the low 50s in the northwest to the upper 60s to low 70s in the southeast.

WATCHES AND WARNINGS:

There are no active watches, warnings or advisories



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 8/7/12:

Solar Activity Forecast: Solar activity is forecast to be at low levels with a slight chance for an isolated M-class flare.

Geophysical Activity Forecast: The geomagnetic field is expected to be at mostly quiet levels on day one (07 Aug), then increase to quiet to unsettled levels on day two (08 Aug) due to a glancing blow from the 04 Aug CME. Day three (09 Aug) should see a return to mostly quiet levels with isolated unsettled periods as the effects of the CME begin to wane.
