WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 5:22 a.m., 8/8/12

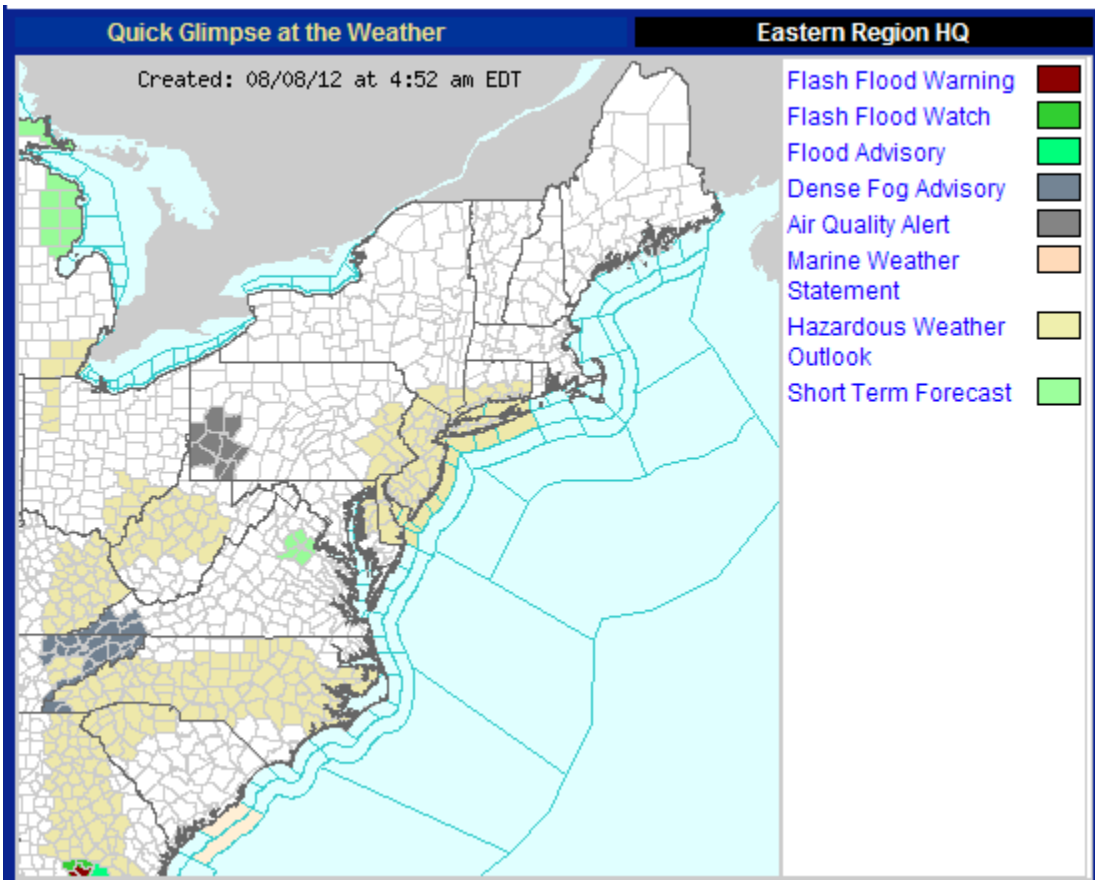
Fair weather will prevail in Pennsylvania through most of today however a weak cold front will move through this afternoon that will bring a slight chance of showers and thunderstorms beginning in northwestern Pennsylvania late today it will make its way through the Commonwealth tonight.

Humidity will increase during the latter half of the week. The chance of showers and thunderstorms will continue to increase in Pennsylvania especially Friday and Saturday with the passage of a stronger front. Fair weather will return Sunday.

High temperatures today will range from the low 80s in the northwest to the low 90s across the southeastern half of the state. Lows this evening will vary from the low 60s in the northern half of the state to the upper 60s and low 70s along the south especially the southeast.

WATCHES AND WARNINGS:

There are no active watches, warnings or advisories



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 8/8/12:

Solar Activity Forecast: Solar activity is expected to be low with a slight chance of an isolated M-class flare.

Geophysical Activity Forecast: The geomagnetic field is expected to be quiet to unsettled with a slight chance of isolated active to minor storm intervals on days one and two (08 and 09 Aug). This increase in activity is expected sometime between mid-day on 08 Aug to early on 09 Aug due to the arrival of the 04 Aug CME. Day three (10 Aug) is expected to return to quiet levels as the effects of the CME subside.
