Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 6:30 a.m., 8/14/12

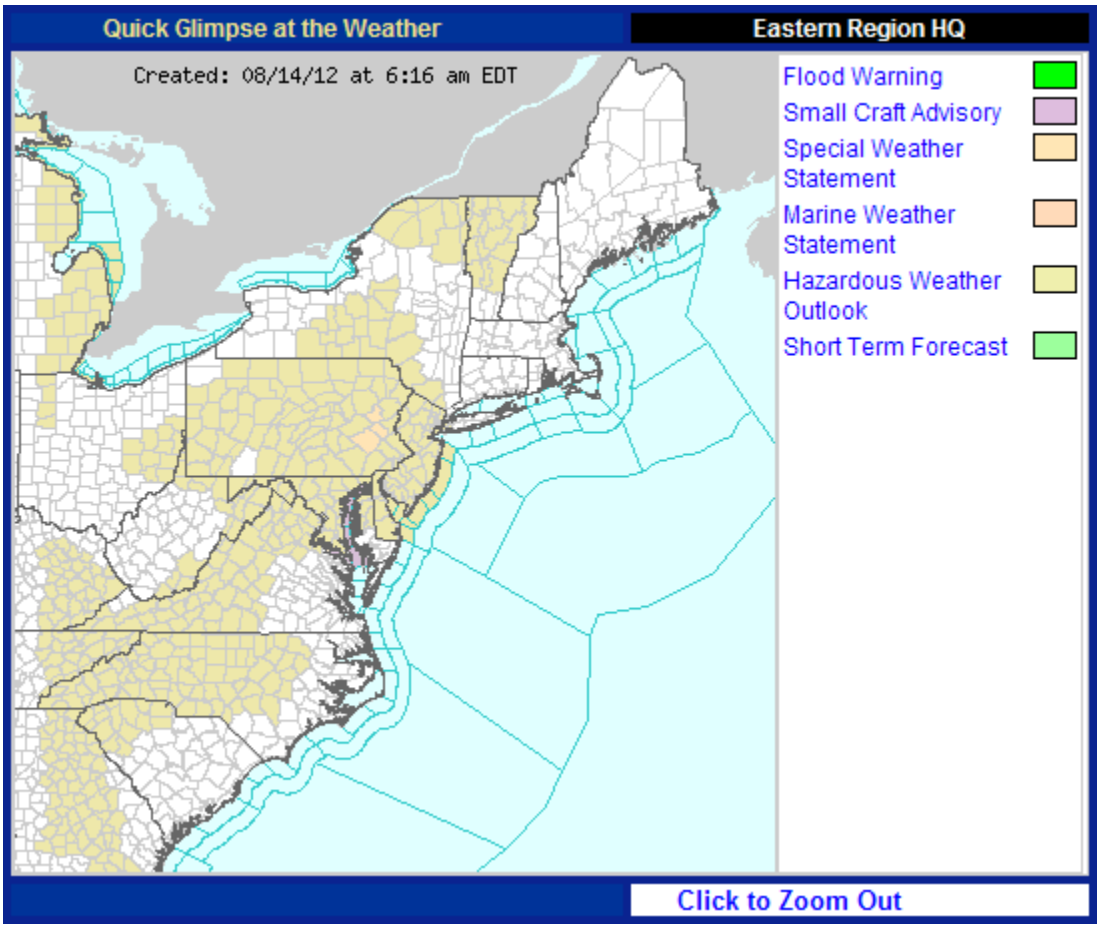
A cluster of showers and thunderstorms associated with an approaching warm front will push through eastern Pennsylvania early today. Another round of thunderstorms is likely this afternoon and evening in advance of a cold front approaching from Ohio. Under mostly cloudy skies, high temperatures today will range from the mid 70s over the northwest mountains to the mid 80s across the lower Delaware Valley.

The slow moving cold front will push across the state tonight accompanied by dwindling showers and thunderstorms, especially across the east. Low temperatures will range from the mid 50s over the northwest mountains to near 70 in Philadelphia.

The cold front will stall out Wednesday across eastern Pennsylvania where scattered afternoon thunderstorms will remain possible. Highs Wednesday will range from the mid 70s over the Allegheny Mountains to the mid 80s across the Southeast Piedmont.

WATCHES AND WARNINGS:

There are no active watches, warnings or advisories.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 8/13/12:

Solar Activity Forecast: Solar activity is expected to be low with a slight chance for an isolated M-class flare.

Geophysical Activity Forecast: The geomagnetic field is expected to be quiet to unsettled with a slight chance for an active period on day 1 (14 August) due to a high speed stream from a coronal hole. Days 2 and 3 (15 - 16 August) are expected to be at predominately quiet levels.
