CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

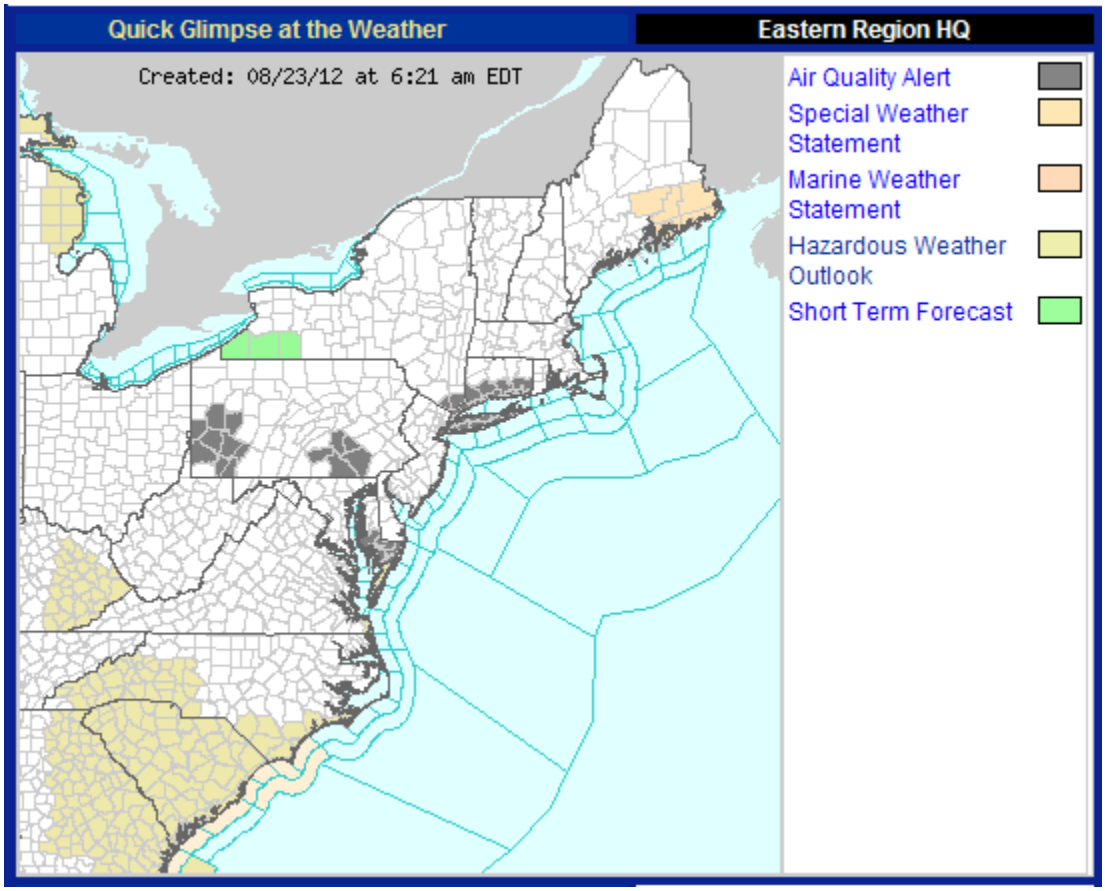
National Weather Service, 5:01 a.m., 8/23/12

Skies were clear overnight across the western two thirds of the Commonwealth. Southeastern sections saw some thin mid clouds stream overhead after midnight. Clear skies and light winds contributed to produce areas of valley fog in the pre-dawn hours. Early morning temperatures ranged from the upper 40s in the north to the mid to upper 60s over the southeast.

Today will be sunny statewide as high pressure remains in place over the region. High temperatures will range from near 80 across the higher terrain of northern and western Pennsylvania to the upper 80s in the Philadelphia area. Similar conditions will persist into this weekend as high pressure drifts east of the region. Slightly higher humidity will arrive and may touch off an isolated afternoon shower or thunderstorm in spots each day. It will remain seasonably warm with highs each day in the 80s and morning lows ranging from the lower 50s in the north to the mid 60s over the southeast piedmont region.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 8/22/12:

Solar Activity Forecast: Solar activity is expected to be very low with a slight chance for C-class flares for the next three days (23-25 August).

Geophysical Activity Forecast: The geomagnetic field is expected to be predominately quiet for days 1-3 (23-25 August).
