CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

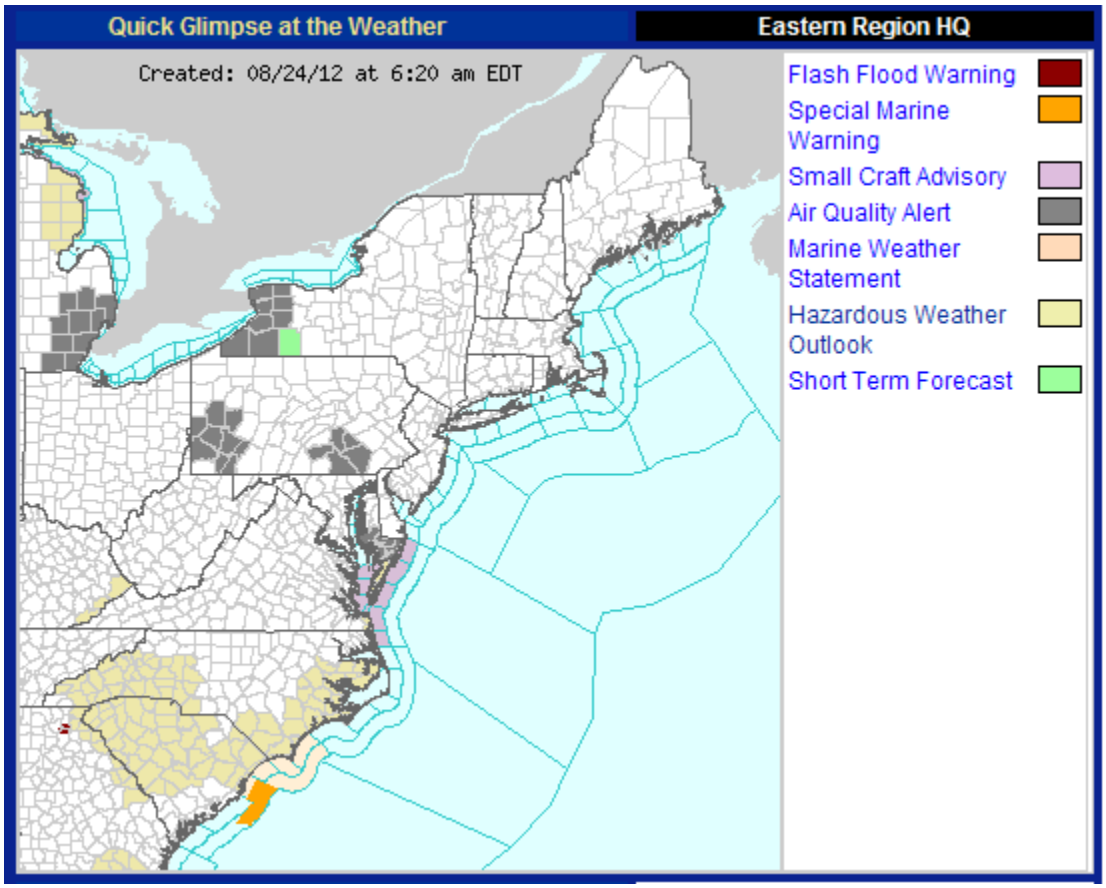
National Weather Service, 6:18 a.m., 8/24/12

High pressure over the Mid Atlantic states will maintain dry tranquil weather across Pennsylvania today and tonight. However, varying amounts of high clouds will affect the eastern half of the state. High temperatures today will be mostly in the low to mid 80s. Lows tonight will range from the low 50s over the northwest mountains to the 60s in the south.

A slow moving low pressure system moving up the East Coast will bring thickening clouds and the chance of showers on Saturday mainly over the southeast part of the Commonwealth. Highs Saturday will range from the mid 70s over the Laurel Highlands to the mid 80s near the Lake Erie shore.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 8/23/12:

Solar Activity Forecast: Solar activity is expected to be very low with a slight chance for C-class flares for the next three days (24-26 August).

Geophysical Activity Forecast: The geomagnetic field is expected to be quiet to unsettled for days 1-2 (24-25 August). Day 3 (26 August) is expected to be quiet to unsettled with a slight chance for an active period due to a high speed stream from a coronal hole.
