None

CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

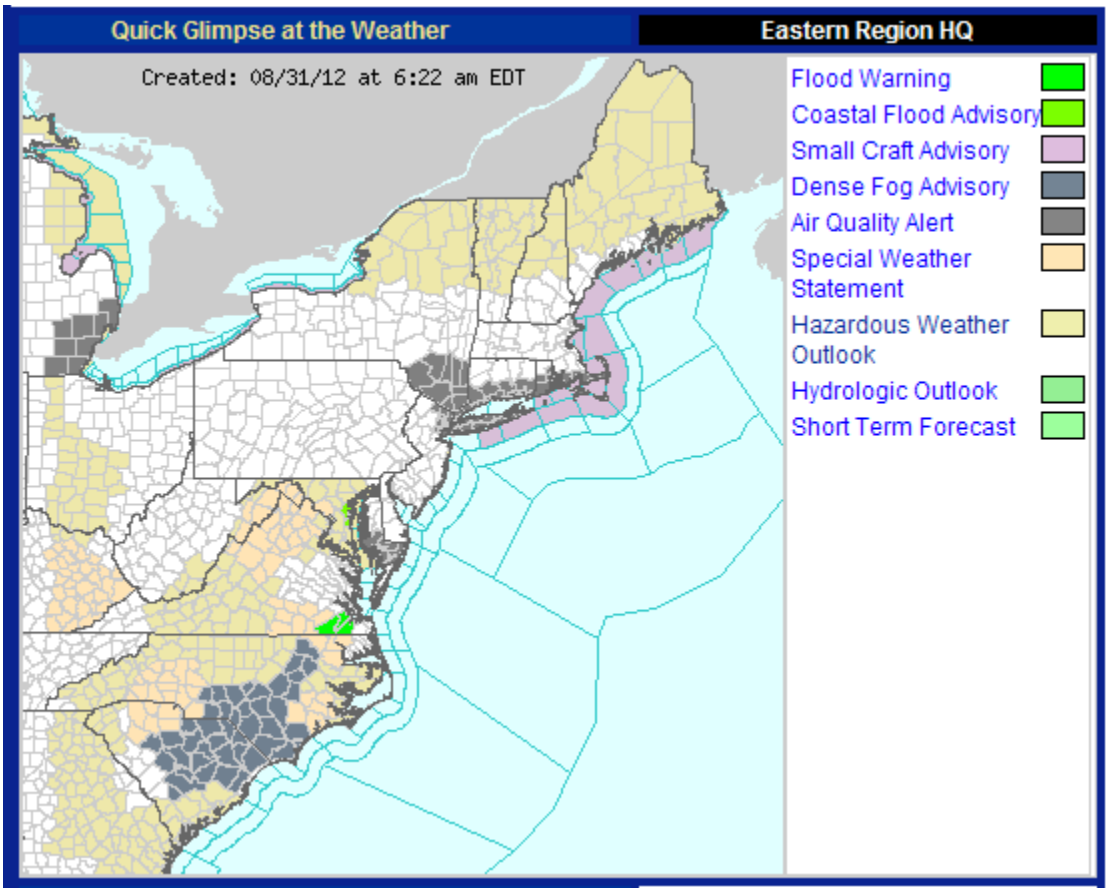
National Weather Service, 6:30 a.m., 8/31/12

High pressure centered over the Carolinas today will bring mostly sunny and very warm weather to Pennsylvania today. High temperatures will range from the mid 80s over the Allegheny Mountains to the low 90s over the southeast piedmont. A weakening cold front will slide south across the state tonight accompanied by no more than a few clouds. Temperatures will be milder than recent nights with lows ranging from the mid 50s over the northern mountains to the upper 60s in the south.

The front will stall out across southwest Pennsylvania on Saturday bringing mostly cloudy skies and the chance of a shower or thunderstorm to that part of the state. However, the rest of Pennsylvania should see mostly sunny and warm weather. Highs Saturday will range from near 80 over northern Pennsylvania to near 90 in the south central valleys.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 8/30/12:

Solar Activity Forecast: Solar activity is expected to be low with a chance for moderate activity.

Geophysical Activity Forecast: Geomagnetic activity is expected to be quiet to unsettled on 31 August and 1 September with a chance for minor to major storm levels at high latitudes. Activity is expected to return to mostly quiet levels on 2 September with a slight chance for active to minor storm levels at high latitudes. Increased activity on days 1 and 2 is due to a coronal hole high speed stream.
