CONTIGUOUS STATE EVENTS OF POTENTIAL INTEREST TO PENNSYLVANIA:

Delaware: No significant events at this time.
Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

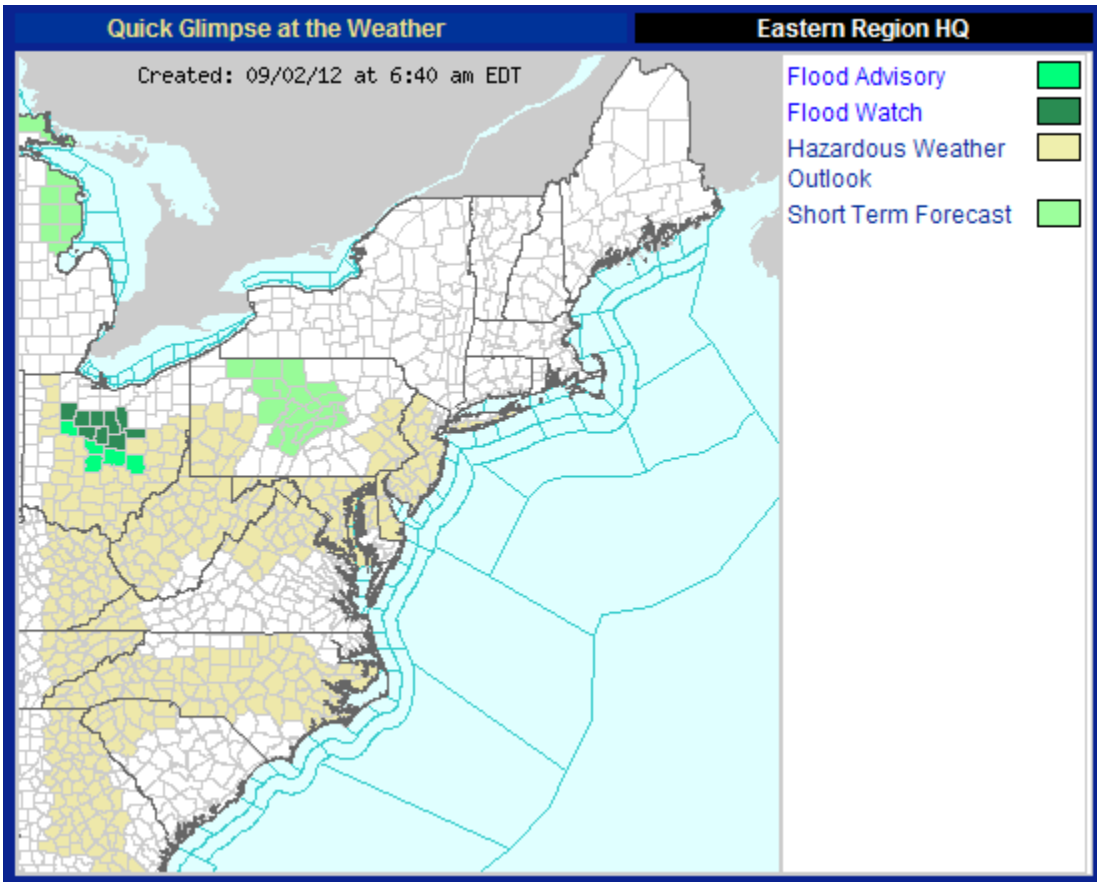
National Weather Service, 5:56 a.m., 9/2/12

A nearly stationary frontal boundary will remain draped across southern Pennsylvania today providing the focus for showers and a few thunderstorms. The best chance of rain will be this afternoon across the southern half of the Commonwealth while the northern tier of the state is likely to remain dry. Under mainly cloudy skies temperatures will be a bit cooler than recent days with highs ranging from the upper 70s to low 80s. However, high humidity will make it feel warmer.

A few lingering showers will continue to affect central and southern Pennsylvania tonight with lows in the 60s. The slow moving frontal boundary will remain over Pennsylvania on Monday bringing overcast skies with scattered showers and a few thunderstorms, especially during the afternoon. It will remain quite humid with high temperatures ranging from 75 to 80 over most of the region.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 9/1/12:

Solar Activity Forecast: Solar activity is expected to be low with a chance for moderate.

Geophysical Activity Forecast: Geomagnetic activity is expected to be quiet to unsettled on 2 September. Activity is expected to increase to minor storm levels with a chance for major storm levels on 3 September with the arrival of the 31 August CME. High latitudes have a chance of reaching severe storm levels on 3 September. On day 3 (4 September), activity is expected to decrease to mostly unsettled conditions as CME effects wane.
