Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 6:31 a.m., 9/8/12

A cold front will move through Pennsylvania today bringing showers and thunderstorms. Thunderstorms will be likely late this morning and through the afternoon and early afternoon as the front moves eastward across the state. Some storms may become severe.

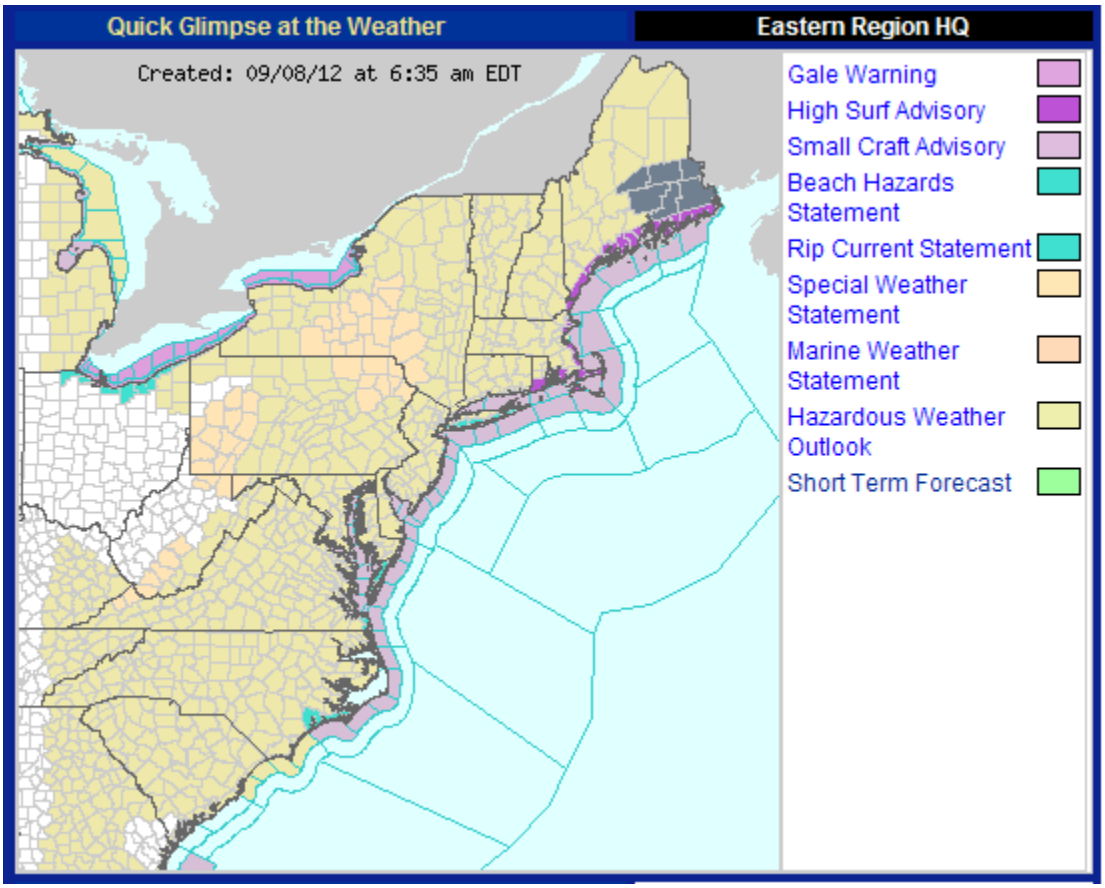
The front will move off the eastern seaboard late Saturday. Some showers will still be possible late Saturday and early Sunday from a shallower secondary trough. High pressure and drier air will bring clearing by late Sunday. Fair weather will then continue for much of next week.

High temperatures today will range from the upper 60s in the northwest to the low to mid 80s in the southeast. Low temperatures will range from the upper 40s to low 50s in the northwest to the upper 50s in the southeast.

Note: The SEOC is monitoring the potential for severe weather today (Saturday) as a cold front is forecast to pass across the state. National Weather Service products will continue to be shared with all state agencies including: State Police, PennDOT, Public Utility Commission and National Guard. Pennsylvania utility companies have been alerted of the weather forecast and the National Guard has issued early warnings to their training troops.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 9/7/12:

Solar Activity Forecast: Solar activity is expected to be low with a slight chance for isolated M-class activity for the next three days (08-10 September).

Geophysical Activity Forecast: The geomagnetic field is expected to remain mostly quiet for the next three days (08-10 September).
