Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

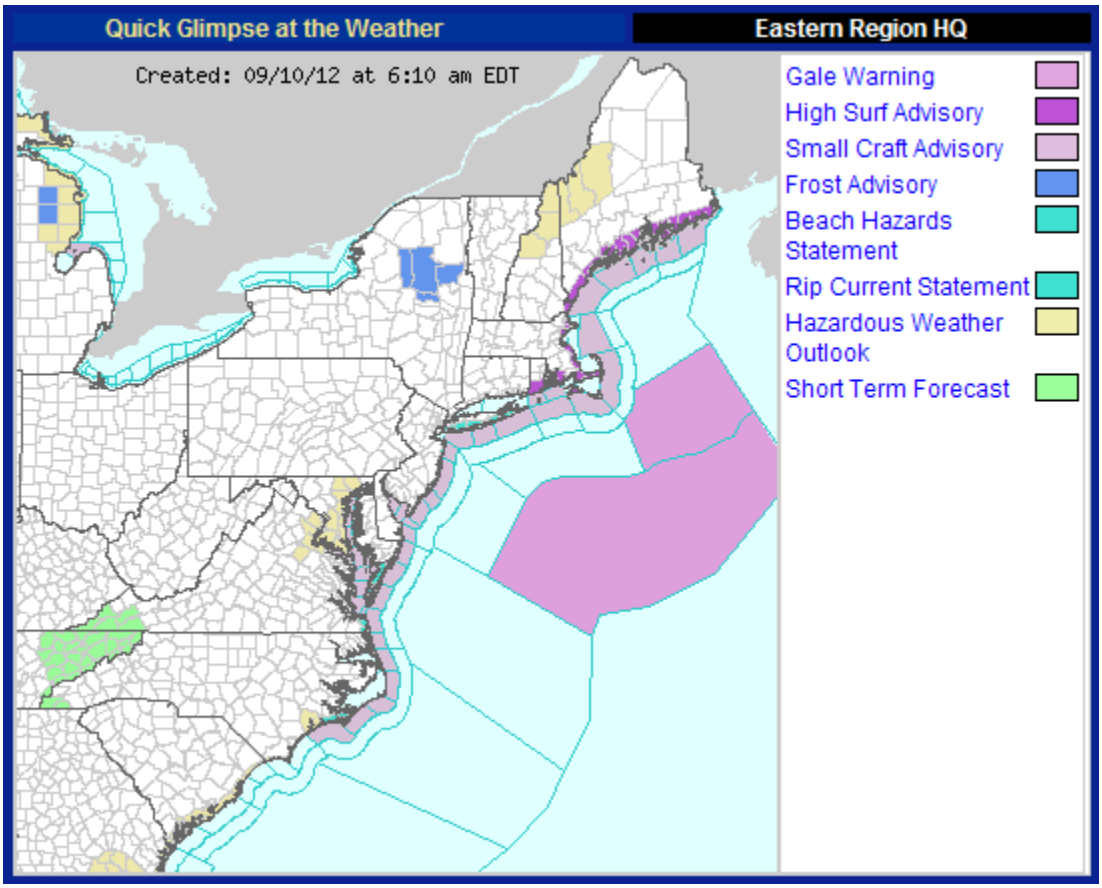
National Weather Service, 5:50 a.m., 9/10/12

Northwest flow this morning will allow for patchy valley fog and low clouds through the early morning. Expect these to dissipate and lift by 9 am. High pressure will maintain fair weather for much of the week. It will begin cooler than normal with a gradual warming trend as the week progresses.

The high temperature today will vary from the mid 60s in the northern mountains to the upper 70s in the lower Delaware Valley. The low temperature tonight will range from low 40s in the northwest to the low 50s in the southwest.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 9/9/12:

Solar Activity Forecast: Solar activity is expected to be low during days 1 - 3 (10 - 12 September) with a chance for an isolated M-class flare.

Geophysical Activity Forecast: Geomagnetic field activity is expected to be at quiet levels during days 1 - 3 (10 - 12 September) with a chance for unsettled levels and a slight chance for active levels on day 3 due to the onset of a coronal hole high-speed stream.
