WEATHER:

24-hour Projected Weather Statewide:

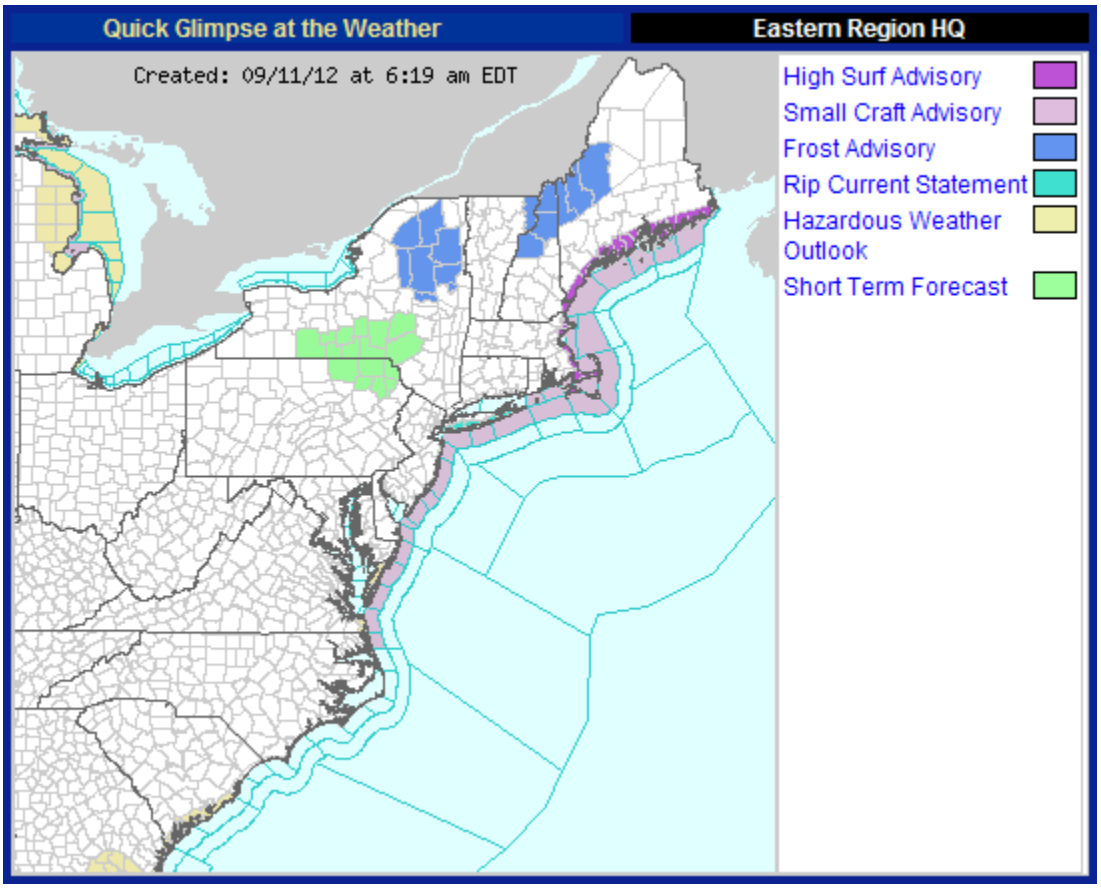
National Weather Service, 5:27 a.m., 9/11/12

High pressure over the eastern United States will maintain fair weather in Pennsylvania for the next several days. Although the week has begun cooler than normal, a warming trend will start by mid week as the high pressure center reaches the coast.

The high temperature today will range from the lower 70s in the Alleghenies to the upper 70s in the southeastern Piedmont. The lows tonight will vary from the low to mid 40s along the northwest mountains to the mid 50s in the southeast.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 9/10/12:

Solar Activity Forecast: Solar activity is expected to be low with a chance for an isolated M-class flare for the next three days (11-13 September).

Geophysical Activity Forecast: Geomagnetic field activity is expected to be at quiet levels with a chance for unsettled levels during the next three days (11-13 September).
