Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

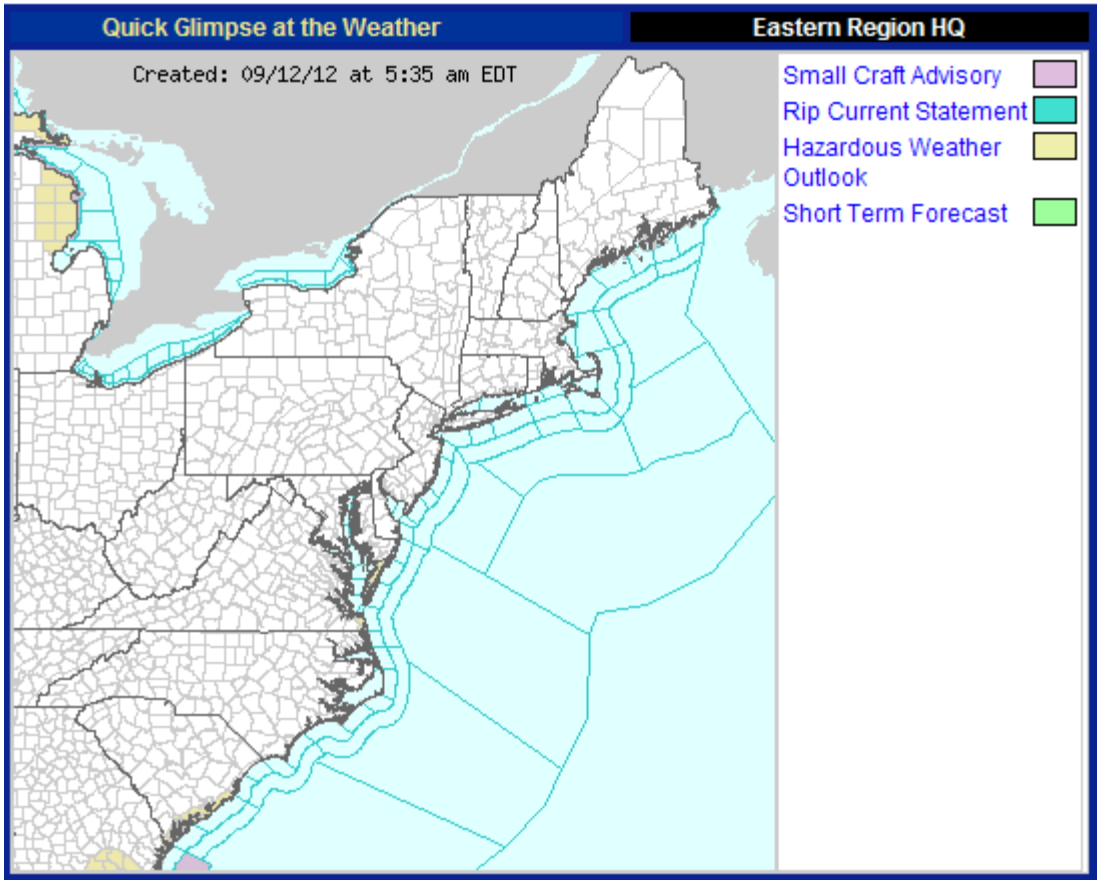
National Weather Service, 6:08 a.m., 9/12/12

Patchy valley fog this morning will slowly lift by 9 am. High pressure centered on the mid Atlantic coast will continue to bring fair weather to Pennsylvania for the next few days. A cold front currently making its way into Wisconsin will bring a chance of showers this weekend.

The high temperatures today will be in the upper 70s to the low 80s across the Commonwealth. Lows tonight will be in the upper 40s to the lower 50s.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 9/11/12:

Solar Activity Forecast: Solar activity is expected to be low with a chance for an isolated M-class flare for the first day (12 September). M-class probability is expected to decrease for the second and third days (13-14 September) as Region 1564 rotates out of view.

Geophysical Activity Forecast: Geomagnetic activity is expected to be quiet with a slight chance for unsettled levels on days 1 and 2 (12-13 September). An increase to quiet to unsettled levels with a slight chance for an active period is expected on the third day (14 September) due to a favorably positioned coronal hole.
