Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

National Weather Service, 5:45 a.m., 9/16/12

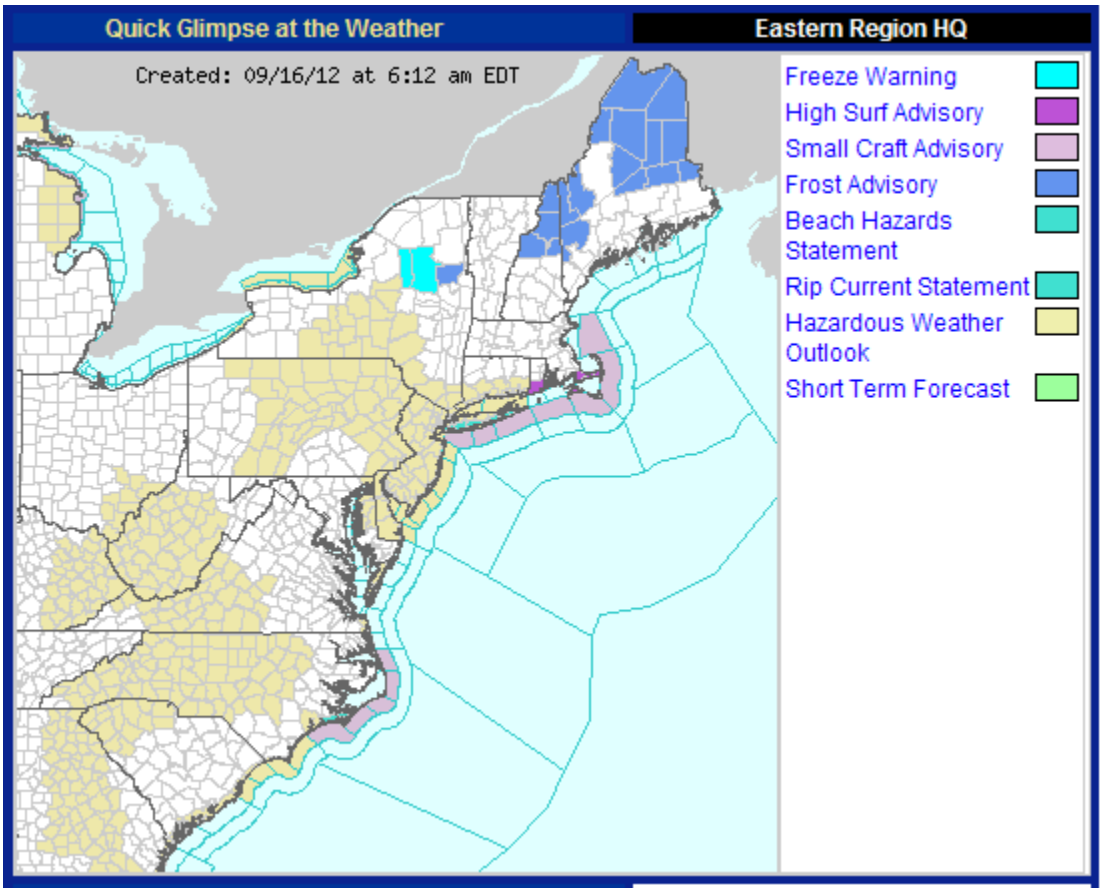
A soaking rain is in store for Monday night and Tuesday. High pressure centered over the Commonwealth will maintain fair weather in Pennsylvania today. Under a mostly sunny sky high temperatures will be in the upper 60s to mid 70s.

The low temperatures tonight will be near 40 in the northern mountains where it should stay clear much of the night. But, clouds will spread into the south and this should hold temperatures above 50 degrees south of the Turnpike.

A cold front will approach from the Midwest and south winds will bring ample moisture into the state early this week. The chance of showers starts Monday afternoon with widespread showers expected Monday night and Tuesday in the western and central cities and Tuesday and Tuesday night in the east. Highs on Monday will be between 70 and 75 for most Pennsylvanians.

WATCHES AND WARNINGS:

There are no active watches or warnings.



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 9/15/12:

Solar Activity Forecast: Solar activity is expected to be very low during days 1 - 3 (16 - 18 September) with a chance for isolated C-class flares.

Geophysical Activity Forecast: Geomagnetic field activity is expected to increase to unsettled levels around midday on day 1 (16 September) with a chance for active levels due to the arrival of the CME associated with the filament disappearance observed on 13 September. Field activity is expected to decrease to quiet to unsettled levels on day 2 (17 September) as CME effects subside. A further decrease to quiet levels is expected on day 3 (18 September).
