Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

24-hour Projected Weather Statewide:

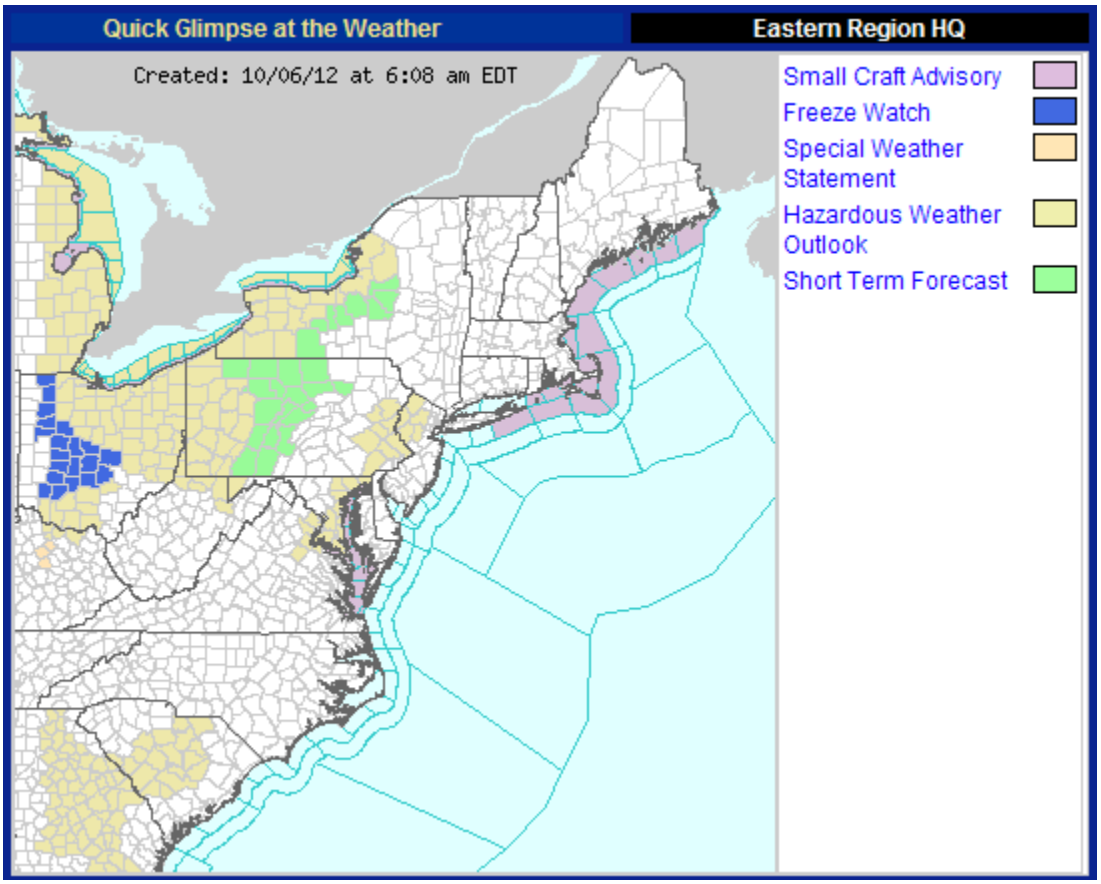
National Weather Service, 5:34 a.m., 10/6/12

A cold front will sweep eastward across Pennsylvania this morning accompanied by a few rain showers mainly over the western half of the Commonwealth. The arrival of drier air will bring clearing skies by late in the day. High temperatures today will range from the low 50s over the northwest mountains to the mid 70s across the lower Delaware valley.

A fast moving area of low pressure will track across the region on Sunday bringing a steady rain to the southeast corner of the Commonwealth and showers elsewhere. Lows tonight will range from the mid 30s over the Allegheny Mountains to the mid 40s around Philadelphia. Under cloudy skies highs Sunday will only range from the upper 40s to low 50s.

WATCHES AND WARNINGS:

None



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 10/5/12:

Solar Activity Forecast: Solar activity is expected to continue at very low levels with the chance for a C-class flare during the forecast period (06-08 October).

Geophysical Activity Forecast: The geomagnetic field is expected to be mostly quiet on days 1-2 (06-07 October). Late on day 3 (08 October), today's CME is expected to become geoeffective causing unsettled to active conditions with a chance for minor storm periods.
