Maryland: No significant events at this time.
New Jersey: No significant events at this time.
New York: No significant events at this time.
Ohio: No significant events at this time.
West Virginia: No significant events at this time.

WEATHER:

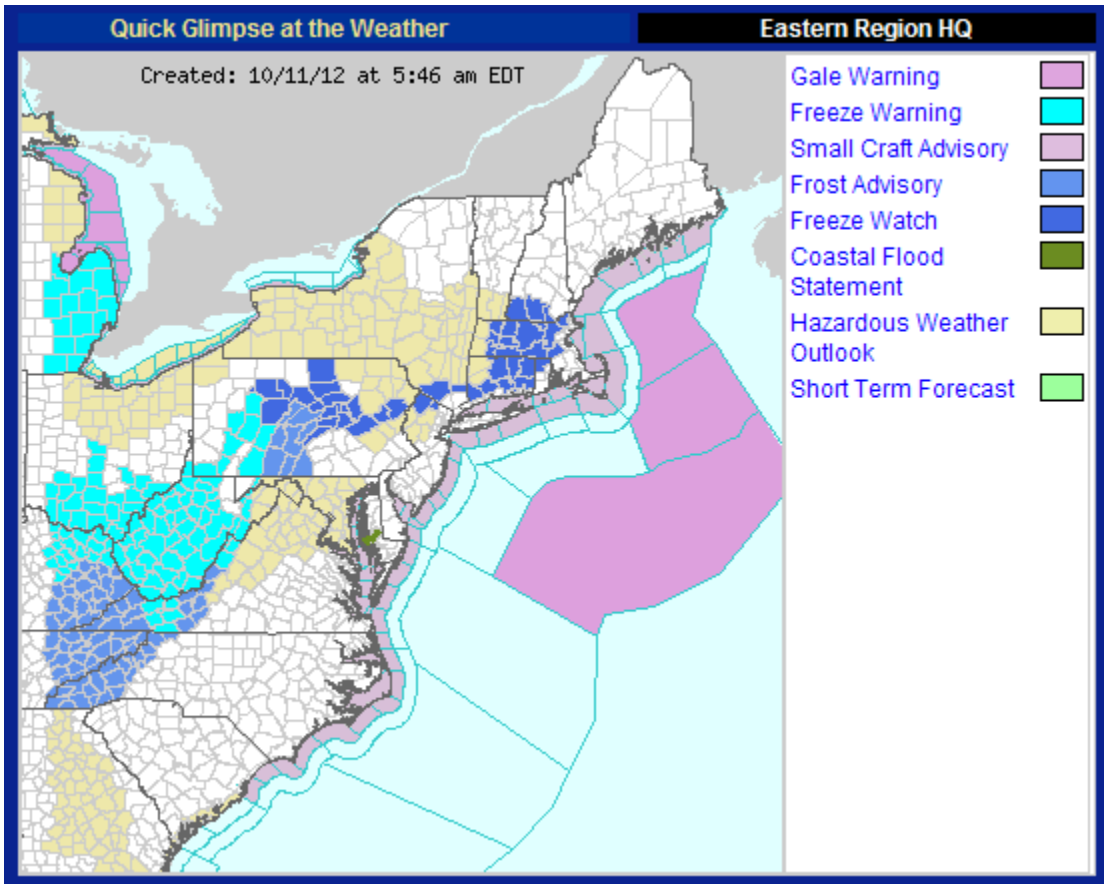
24-hour Projected Weather Statewide:

National Weather Service, 5:27 a.m., 10/11/12

As the gusty winds subside early this morning high pressure will bring clearing to Pennsylvania this morning and through the day. Expect the high temperatures to be 5 to 10 degrees below normal highs will range from the low 50s in the northwest to the low 60s in the southeast. Another system will move through from the north early Friday with precipitation possible along the New York border. The low temperatures tonight will range in the mid to upper 30s across most of the Commonwealth. Areas near and around Philadelphia will be significantly warmer with lows in the mid 40s.

WATCHES AND WARNINGS:

None



NOAA / SPACE WEATHER PREDICTION CENTER:

3-day Solar-Geo-Physical Forecast, 10:00 p.m., 10/10/12:

Solar Activity Forecast: Solar activity is expected to be low with the chance for moderate levels over the next three days (11-13 October).

Geophysical Activity Forecast: The geomagnetic field is expected to be quiet to unsettled with isolated active levels on day one (11 October) as coronal hole effects continue. Mostly quiet conditions are forecast for days two and three (12-13 October).
