PA PREPARED LEARNING MANAGEMENT SYSTEM
General Overview

Purpose

The PA Prepared Learning Management System (LMS) is a web-based delivery system of education programs and information-sharing related to public health and emergency preparedness. The LMS allows Pennsylvania health and emergency response professionals to complete training and share information in the convenience of their workplace or home. Authorized individuals are given access through the URL www.pahealthinfo.net. LMS access is available 24/7 to registered users.

Benefits

- Reduction in classroom scheduled training programs that cost time and money
- Delivery of training anytime – day or night
- Access to training at home or on the job
- Access to courses provided by leading state and national experts
- Ability to communicate electronically across geographic and organization boundaries

Features

- Track user progress and generate certificates of completion
- A comprehensive information library
- Discussion groups
- Web conferencing capability
- File exchange capability
- Continuing education accreditation for multiple health & emergency services professions
- Registration of select instructor-led (classroom) courses

Content

- Course topics include emergency response, disaster preparedness, hospital preparedness, risk communication, and courses specific to professional scope of practice
- Emergency Management Institute (EMI) Independent Study courses offered on the LMS are not duplicated and completion results are maintained by EMI

Registered Users of the LMS

- Users include public health and emergency service providers that work in or respond to public health events or emergencies in Pennsylvania
- Each user is assigned a unique username and initial password

Technical Requirements

- MS Windows 98/ME/2000/NT or Apple OS 7.0 or better
- Web Browser
- 15 inch Color Monitor
- 800x600 screen resolution, 1024x768 strongly recommended
- 56K Dialup Modem connection to the Internet. High Speed connection preferred
- Sound Card with speakers connected
- FLASH software
- Adobe Acrobat Reader software
