 January 24, 2012

Termination Date:
 April 30, 2012

Rescinds Circular Number:

Subject:

2012 Spring Hazardous Weather Emergency Preparedness Exercise

Scope:

All Applicable Commonwealth State Agencies, County and Municipal Emergency Management Agencies, Public and Private schools, and Custodial Child Care Facilities

Distribution:

- See participating agencies
- www.pema.state.pa.us

By Direction of:

Glenn M. Cannon, Esq.

Director, PA Emergency Management Agency

I. PURPOSE

The circular provides guidance and information on the 2012 Spring Hazardous Weather Emergency Preparedness Exercise. The state scenario will be conducted on March 29, 2012 and will begin at 8:30 a.m. and terminate at 2:00 p.m.

II. DEFINITIONS

Custodial Child Care Facility - a child daycare center as defined under Section 1001 of the Act of June 13, 1967 (P.L. 31, No. 21), known as the Public Welfare Code, or a nursery school licensed or regulated by the Commonwealth of Pennsylvania.

III. GENERAL INFORMATION

- A. The Pennsylvania Emergency Management Agency (PEMA), in conjunction with the National Weather Service (NWS), will conduct the 2012 Spring Hazardous Weather Emergency Preparedness Exercise on Thursday, March 29, 2012 for all counties within Pennsylvania. It will coincide with the Commonwealth of Pennsylvania's Severe Weather Awareness Week, March 26 to 30, 2012.
- B. Each county Emergency Management Agency (EMA) will receive an exercise "Severe Weather Warning" message on March 29, 2012, that will establish the foundation for the exercise. Additionally, a daily "Public Information Statement" will be issued throughout the week providing information on the following weather topics: tornados, severe weather, flash flooding, river flooding, and SKYWARN spotters.

Training and Exercise Division, RA-exerciseofficer@pa.gov, 717-651-2214

PEMA Circular: C2012-01

Effective Date: January 24, 2012

Page Number: 2

C. An alternate exercise date will be Thursday, April 12, 2012, should an actual event preempt the primary date.

- D. This exercise is posted on the Homeland Security Exercise and Evaluation Program (HSEEP) National Exercise Schedule (NEXS) System. Requests to join the Pennsylvania domain must be sent via email to RA-exerciseofficer@pa.gov.
- E. This exercise is an opportunity for all schools, public and private, and custodial child care facilities to fulfill annual requirements to conduct a disaster response or emergency preparedness plan drill.
- F. County 9-1-1 Centers and Emergency Operations Centers (EOCs) are invited to take advantage of this exercise to conduct an exercise of their own and review their severe weather response plans.
- G. Alert notifications of the exercise weather conditions will be transmitted through established channels, including the Pennsylvania Statewide Telecommunications Alerting and Reporting (PASTAR) Network, Commonwealth Law Enforcement Assistance Network (CLEAN), and the State Emergency Voice Activated Network (SEVAN).
- H. Applicable state agencies will be represented in the State Emergency Operations Center (SEOC).
- I. PEMA has retained the services of Yale New Haven Center, to help implement the Hazardous Weather Emergency Preparedness 2012 Spring Exercise. Participating organizations may be contacted directly by the Yale New Haven Center for coordination of exercise details and can be reached via e-mail at pemaexercise@ynhh.org.

IV. REGISTRATION

- A. Registration for this exercise is required for audit and statistical reporting. All participating entities, with the exception of state agencies, are requested to register online.
- B. **Registration opened December 19, 2011** and will only be accepted through the PEMA website at www.pema.state.pa.us by clicking on the Spring Exercise button. It is acceptable to use "N/A" in fields that are not applicable.
- C. In order to properly document participation in this exercise the following are requested to register no later than March 22, 2012: school districts, private educational institutions, dioceses, intermediate units, hospitals, correctional facilities, nursing homes, adult/child day care centers, community infrastructure organizations, and county and municipal governments.

V. EXERCISE OBJECTIVES

- A. The following target capabilities will be addressed during the exercise:
 - 1. EOC Management
 - 2. Communications
 - 3. Emergency Public Information and Warning

PEMA Circular:

C2012-01

Effective Date:

January 24, 2012

Page Number:

3

- 4. Critical Resource Logistics and Distribution
- B. The following objectives will be addressed during the exercise:
 - 1. Validate and test the SEOC's plans, policies, and procedures in response to a severe weather incident affecting the entire Commonwealth of Pennsylvania.
 - 2. Test systems and processes for emergency public information and warning in response to a severe weather event to ensure timely and effective message dissemination.
 - 3. Provide an opportunity for counties, municipalities, and public and private schools to test emergency procedures.

VI. CONCEPT OF OPERATIONS

- A. The HSEEP is the cornerstone of the exercise program in Pennsylvania. It is expected that all levels of government will use the concept, form, and spirit of the HSEEP during this exercise. This should ensure full HSEEP compliance. More information on exercise planning can be found on the Homeland Security website at www.hseep.dhs.gov.
- B. This is intended to be a severe weather exercise only. Counties are requested not to add non-weather related events, as these injects could impact the adjacent counties and unnecessarily increase the scope of the exercise.
- C. The NWS will provide all weather-related exercise message traffic.
- D. Damage reporting will follow standard operating procedures through the Pennsylvania Emergency Incident Reporting System (PEIRS). For example, local facilities report to municipal EOCs, municipal EOCs report to county EOCs, and county EOCs report to the SEOC.
- E. Each county or other participating jurisdiction is to assign a Master Scenario Events List (MSEL) coordinator and provide the coordinator's information to their respective PEMA Area Office. The MSEL coordinator will inject previously developed or spontaneous exercise messages into the county exercise at the appropriate times, in accordance with the county MSEL. This MSEL should generate actions that will allow the county to meet its exercise objectives. Attachment (1) provides guidance on the scope of the inject messages.
- Each participating jurisdiction should develop its own exercise or drill that would challenge those functional areas they want to test and evaluate. Attachment (2) contains a sample exercise MSEL. County EMAs should notify their respective PEMA Area Office prior to the exercise.
- G. PEMA Area Offices are to provide assistance requested by the respective counties, participate in their usual coordination role, and prepare a report on their assigned counties' activities.
- VII. MUNICIPALITIES, SCHOOLS, HOSPITALS, NURSING HOMES, DAYCARE CENTERS, COMMUNITY INFRASTRUCTURE, AND VOLUNTEER ORGANIZATIONS

PEMA Circular: 0

C2012-01

Effective Date:

January 24, 2012

Page Number:

4

A. Each county Emergency Management Coordinator (EMC), should contact their municipalities and encourage participation, along with that of their elected officials. This exercise will afford municipalities an excellent opportunity to test their emergency plans and warning procedures. A generic participant letter can be found in Attachment (5), which you may tailor for your use.

- B. Each county EMC should encourage school districts, private educational institutions, dioceses, intermediate units, hospitals, correctional facilities, nursing homes, adult/child day care centers, community infrastructure organizations, and volunteers to coordinate appropriate procedures and protocols required for their full participation in the exercise. Each of these organizations should also be encouraged to obtain and use an NWS-National Oceanic and Atmospheric Administration (NOAA) weather radio.
- C. This exercise is one of the few opportunities that school districts, parochial districts, educational intermediate units, hospitals, correctional facilities, nursing homes, adult/child day care centers, community infrastructure organizations, emergency assistance volunteers (Community Emergency Response Teams or Community Assistance Teams), and auxiliary communications services volunteers have to test their plans in coordination with local governments under simulated emergency conditions. The point of contact for each is their county EMC. A comprehensive list of county EMCs can be found on the PEMA website.

VIII. EMERGENCY ALERT SYSTEM

- A. The NWS will, in addition to their Wednesday Routine Weekly Test (RWT), conduct an RWT on March 29, 2012 at 9:00 a.m., 10:00 a.m., and 11:00 a.m. Although there will be no reference to the exercise in the content of the RWT message, those participating in the exercise should use the RWT message as the signal to begin their exercise or drill.
- B. During the entire week, users of programmable NWS weather radios are asked to ensure their radios are set to alarm for both the RWTs. This should help remind planners and trigger testing of their emergency plans.
- C. During the exercise, it is recommended that all counties review their local Emergency Alert System (EAS) procedures.

IX. PERFORMANCE STANDARDS

- A. The SEOC shall ensure receipt of weather messages at the county EOCs within 15 minutes of release by the NWS and within 10 minutes for tornado and flood warnings. The SEOC shall validate the connectivity of the PASTAR network.
- B. Counties shall forward to the SEOC any unmet needs that are not resolvable at a lower jurisdiction level within one hour of that determination. PEMA Area Office personnel should be fulfilling their roles as Liaison Officers.
- C. The SEOC shall coordinate the filling of unmet needs by those agencies responsible for doing so and/or advising the requesting agencies of the status of their requests within one hour of receipt of the request.

PEMA Circular:

C2012-01

Effective Date:

January 24, 2012

Page Number:

- 5

D. Counties should send in their Initial Damage Reports (IDRs) within two hours of completing their assessment to the SEOC.

X. EMERGENCY OPERATIONS CENTERS

- A. Each county should activate its EOC and staff appropriately for this exercise.
- B. Counties shall develop, conduct, and evaluate their own exercises.
- C. The SEOC will be activated and staffed appropriately per exercise requirements.

XI. COMMUNICATIONS

A. All available communications systems, PEMA website, PASTAR, SEVAN, CLEAN, state and local auxiliary communications services [ACS], telefax, telephone, NWS, and NOAA weather radio system, will be activated during the entire period of this exercise. The weather exercise offers an excellent opportunity for the emergency management community to test the entire range of communications systems. The NWS SKYWARN system will be activated. This system provides for communications between the NWS and their observers who relay weather information to NWS. PEMA will have ACS communications personnel available the day of the exercise.

XII. REPORTS AND TIMELINE

- A. PEMA will send each county EMC an email containing an extract of online registrations of participants from their county **no later than April 5, 2012**.
- B. Participating entities should contact their county EMC to ensure integration into the county exercise. Visit the PEMA website for a current list of county EMCs. Following the exercise, county EMCs may request that applicable participants submit a copy of their Exercise Report [Attachment (4)] to the attention of the county EMC no later than April 9, 2012.
- C. For audit and statistical purposes following the exercise, schools, hospitals, nursing homes, adult/child day care centers, and other participating organizations are requested to complete the Exercise Report form found on the PEMA website no later than April 13, 2012.
- D. County EMCs are asked to review submitted reports and assist participant management with updating their existing plans. County EMCs are asked to consolidate exercise reports and forward a final report to their PEMA Area Office no later than April 16, 2012.
- E. Following the exercise, each county EMC is requested to complete the Evaluator's Report [Attachment (3)] and submit it to the appropriate PEMA Area Office **no later than April 20, 2012**.
- F. PEMA Area Offices shall forward the county EMCs' Evaluator Reports to the PEMA Training and Exercise Division **no later than April 24, 2012**.

23.	April 24, 2012	PEMA Area Offices will forward evaluator reports to PEMA, Training and Exercise Division

XIII. ADMINISTRATIVE NOTES

- A. Questions regarding the exercise or any other aspects of Weather Emergency Preparedness Week, should be directed to:
 - 1. The respective PEMA Area Office

A. Central Area Office: 717-651-7060 or 800-272-7362

В. Eastern Area Office: 610-562-3003 or 800-372-7362

Western Area Office: 724-357-2990 or 800-972-7362 C.

2. The PEMA State Training and Exercise Officer, 717-651-2256 or via email at RA-exerciseofficer@pa.gov.

XIV. PARTICIPATING AGENCIES

- A. PEMA and applicable state agencies
- NWS Forecast Offices: Mt. Holly, New Jersey; Binghamton, New York; В. Cleveland, Ohio; Pittsburgh, Pennsylvania; and State College, Pennsylvania
- C. NWS Mid-Atlantic River Forecast Center (MARFC), State College, Pennsylvania
- D. Private and public schools, education intermediate units, and adult/child daycare centers
- E. Hospitals and nursing homes
- F. Facilities, such as: prisons, correctional facilities, youth correctional centers, and local, county, and state offices
- Public utility authorities, such as water and sewage treatment facilities G.
- Television and radio stations on the EAS Н.
- Any community or volunteer organizations or associations approved by a I. county EMA wanting to test their emergency response plan in cooperation with the SEOC and county EMA

Guidance on Conduct of Exercise

- 1. The NWS and PEMA developed a weather scenario that places severe weather conditions within your county. County coordinators are responsible for the actual weather events within each county to ensure the county exercise objectives are met.
- 2. The conduct of this exercise must be within, and in compliance with, the spirit and intent of the Homeland Security Exercise and Evaluation Program (HSEEP).
- 3. Inject Messages MSEL coordinators, assigned by each participating jurisdiction, should develop exercise messages of simulated weather events to be inserted into the exercise, based on the MSEL in Attachment 2 to generate actions by emergency response agencies. These messages must be clearly marked as exercise messages and must:
 - a. Be realistically injected into the exercise at such frequency as to allow a continuous, logical flow of events.
 - b. Not involve or impact another county unless pre-coordinated with the county EMC.
 - c. Have required actions on the part of emergency response agencies that will meet all the objectives of the exercise.
 - d. Be challenging and require problem-solving, management of resources, and coordination.
 - e. Be oriented to require a response or involvement by the county EMA, rather than routine handling by dispatch centers.
 - f. Not involve large-scale operations, such as: major evacuations, urban search and rescue, handling mass casualties, etc.
 - g. Include in the exercise some day-to-day routine incidents to ensure the proper prioritization of, and eventual resolution of, all exercise events.
 - h. Generate the requirement to develop reports to outside agencies.
 - i. Involve all the county participants taking part in the exercise, e.g., hospitals, school districts, nursing homes, day care centers, etc.
 - j. Require the implementation of established plans and procedures.
- 4. All MSEL events that a county may want the SEOC to inject for them into the exercise must be sent to State Training and Exercise Officer no later than March 16, 2012. A sample list of injects is located in Attachment 2. Include the written inject, the time you want the inject entered, and the name, e-mail address, or phone number to which you want the message delivered and a name and phone number for a point-of-contact for the inject.
- 5. NWS Start and Finish Times
 - a. Western 0900 hours, Severe Thunderstorm Warning 1200 NWS ENDEX
 - b. Central 1000 hours, Severe Thunderstorm Warning 1300 NWS ENDEX
 - c. Eastern 1100 hours, Severe Thunderstorm Warning 1400 NWS ENDEX
- 6. SEOC Significant Times
 - a. 0830 hours Initial Exercise Brief to Participants

- b. 1400 hours Final Exercise Brief
- c. 1430 hours Hot Wash in Room 180A at PEMA Headquarters

Attachment #2

Weather Watches Yes No Weather Warnings Yes No
8. Did you identify needs during the course of this exercise and report them to the county EMA? Yes No 9. Did you receive a response from the county regarding your reported needs within one hour? Yes No
10. Did you report simulated damage to the county EMA as a result of the severe weather during the exercise? Yes No
11. Does each facility have the capability to operate from an alternate emergency power source? Yes No Was it tested during this exercise? Yes No
12. How long did it take for your residents/students/staff to be in their protective positions after the tornado warning was issued?
13. List the required changes to your EOP that became evident as a result of this exercise.
14. List any suggestions or recommendations regarding the development and conduct of this exercise that would result in greater benefits to your facility.
Signature Title and Date

SAMPLE PARTICIPANTS LETTER

Dear Participant:

Each year during the month of March, the Pennsylvania Emergency Management Agency (PEMA), in conjunction with the National Weather Service (NWS), sponsors a Weather Emergency Preparedness Week. During this week, exercises are conducted to test the plans and preparedness of counties, schools, hospitals, nursing homes, day care centers and critical infrastructure facilities to appropriately respond to emergency, life-threatening situations that can be caused by severe weather events. The Annual Spring Hazardous Weather Preparedness Exercise was conducted last year on March 1, 2011.

PEMA, in conjunction with the NWS, will conduct the 2012 Spring Hazardous Weather Preparedness Exercise on Tuesday, March 29, 2012, for Pennsylvania counties, public safety and support personnel, and the agencies that support them. It will coincide with the Commonwealth's Weather Emergency Preparedness Week, March 26th through March 30th, 2012. An alternate exercise date has been set aside for Thursday, April 12, 2011, should an actual severe weather event occur on the primary date.

Each county will receive an exercise "Severe Weather Warning" message on Thursday, March 29, 2012 that will establish the foundation for the exercise. Additionally, a daily NWS "Public Information Statement" will be issued throughout the week providing information on the following weather topics: Tornados, Severe Weather, Flash Flooding, River Flooding, and Skywarn Spotters.

This exercise will afford all participants the opportunity to review and exercise their emergency response plans for severe weather emergencies. The testing of emergency plans and procedures is essential to ensure the safety of persons placed in your care. Disasters in the past have identified the vulnerability of facilities to power outages and the need for alternate emergency power sources. This would be an excellent time to test your alternate power sources and stress employee preparedness measures for themselves and their families. It is also suggested that you monitor your local NWS radio frequency during the exercise for early alert notifications and subsequent weather updates and messages.

Please register for the exercise as soon as possible by accessing the PEMA website at: www.pema.state.pa.us. By clicking on the Hazardous Weather Exercise link, you will be linked to the exercise page. To register for the exercise and for other important information, click on the How to Participate link.

It is very important that the exercise be evaluated. PEMA requests that you conduct your own evaluation and report the results to the county Emergency Management Agency (EMA) within five (5) business days following the exercise. A link to the list of county EMCs can be found on the home page of PEMA's website. Please keep a copy of your exercise results on file.

You are encouraged to contact your county Emergency Management Coordinator as soon as possible and report your desire to participate in this exercise. They are a

great resource to assist in the development of site-specific and measurable objectives. This will also ensure early notification to your district in the event of an actual emergency by giving the County and the Municipal EMA coordinators an opportunity to update your contact information.

Past weather exercises have improved our local and state emergency preparedness and response efforts in Pennsylvania. Through your participation in this exercise, you will be joining thousands of citizens across the Commonwealth in a continuing effort to enhance our future preparedness. Now is the time to be ReadyPA!
