Part D
4Rx Identifier Edit

CMS has mandated that by July 1, 2012, all Part D sponsors require pharmacies to use current 4Rx data for Medicare Part D drug claim submissions. The 4Rx data is comprised of the following data elements found on the cardholder's ID card:

RxBIN   **RxPCN**

RxGrp   **RxID**

Beginning no later than July 1, 2012, Part D sponsors will reject claims where the 4Rx data submitted is not valid using one or more of the following NCPDP Reject Codes:

01 M/I BIN Number   **04 M/I Processor Control Number**

06 M/I Group ID   **07 M/I Cardholder ID**

Claims rejected by the Part D plan for these errors will also be denied by PACE/PACENET. These rejected claims must be corrected before PACE/PACENET will accept them for processing.

Questions should be directed Provider Services at: 1-800-835-4080.
