

# 1122 PROGRAM

## SUPPLIES AND SURPLUS OPERATIONS

### What You Can Get From the Defense Logistics Agency

There are a number of DLA Supply Centers to support you. Each center manages certain types of items that support various types of air, land, and marine weapons systems or product groups (such as fuel or clothing). For information regarding the availability of specific items, please contact us.

Your organization will incur a service charge to cover the state's cost of administering this program. The service charge is either 4% of the total transaction, or \$500.00, whichever amount is the lesser.

#### Defense Supply Center Columbus (DSCC)

DSCC provides the following items to state and local law enforcement agencies:

- Gun Parts
- Fire Control Equipment
- Vehicular Components
- Water Purification Equipment
- Prefabricated Structures

- Rim Locks
- Stud Link Chains
- Fibrous Rope
- Food Service Equipment
- Lighting Fixtures
- Photographic Equipment and Supplies
- ADP Equipment
- Dog Handling Items

# 1122 PROGRAM

## SUPPLIES AND SURPLUS OPERATIONS

### Defense Supply Center Richmond (DSCR)

DSCR provides the following items to state and local law enforcement agencies:

- Critical Safety-Of-Flight Air Frame Structural Components
- Aircraft Engine Parts
- Lubricating Oils
- Industrial Gasses
- Precision Instruments
- Environmental Products

### Defense Energy Support Center (DESC)

DESC provides for aircraft refueling at commercial airports under the Into-Plane Fuel Contracts program. DESC contracts with Fixed Base Operators at over 500 commercial airports worldwide to provide refueling for US Military and Federal Civilian aircraft. Any Federal government or authorized aircraft, such as those under the responsibility of State and local law enforcement agencies, may utilize DESC Into-Plane contracts, provided that the agency has an AIR Card and a commercial fuel purchasing card co-branded by AVCARD, the current DESC Credit Card Processor. The AIR Card simplifies billing/invoicing procedures for DESC Into-Plane contractors, and allows aircrews the opportunity to purchase authorized ground services, if needed. The CCP is responsible for processing all DESC Into-Plane contract invoices to the government office which, in turn, bills the activity based on the information on the AIR Card.

### Defense Logistics Information Services (DLIS)

DLIS serves as a major information agent for the Federal government by cataloging all supplies and parts used routinely by all Federal agencies. DLIS assigns National Stock Numbers (NSNs) to all items and records such data as price, source of supply, substitute parts, and physical and performance characteristics. DLIS also maintains records on vendors doing business with the Federal government, including Commercial and Government Entity (CAGE) code, company address and phone number, and socioeconomic data, and provides this information in a variety of media. Information regarding items and vendors is available online through the Logistics Remote Users Network (LOGRUN) as well as via CD-ROM through a product called FEDLOG.
