PCCD Egrants Creating a Project Modification Request Quick Start Guide

This Quick Start Guide may be used when one or more of the following circumstances arise, requiring you to create a Project Modification Request within Egrants:

- A change(s) between budget categories: Changes that exceed 10% of total project cost. (Total project cost is the sum of the PCCD, project income and applicant's match funds.)
- A change(s) to purchase additional items or other items that were not included in the approved project budget.
- A change(s) to the personnel positions listed in the approved project budget including major salary reductions and increases.
- A change which affects the project's objectives or scope, e.g., a change in the target population and/or services to be provided. Minor changes in a project are to be reported on the Quarterly Progress Report.
- A change in dates of the project's duration. There will be no extension of duration for RASA funds.

PCCD must receive your original signed modification request at least 30 days prior to the end of your grant to ensure PCCD's consideration of the request. In the last 30 days of the project period, exceptional requests for modification may be considered, but only if a detailed justification for the late request accompanies the request and PCCD finds the justification merits its consideration. No modification requests will be considered or approved if they are received by PCCD after the end of your grant.

Please note: Once the modification is approved, it becomes the current document. You can still view the original application/continuation in Egrants, but the modification contains the current information, once approved.
