¹ Figures derived from the 2008 Health Insurance Survey conducted by Market Decisions LLC for the Pennsylvania Insurance Department (PID). All numbers and percentages are estimates and have margins of error that must be considered in any assessments or comparison. (See the section on survey methodology in the survey, available on the PID Web site.) This chart does not reflect what portion of the uninsured may be eligible or may qualify for CHIP, adultBasic, Medicaid, or any other government program. ² Due to the small number of uninsured children found in the sample in Elk county, the number was estimated based on the results in adjacent counties.
