SECTION 9 – ONLINE ORDERING / PA SIIS

Online Ordering

During 2012, all Pennsylvania Department of Health (PADOH) vaccine ordering was transitioned from paper to online through Pennsylvania Statewide Immunization Information System (PA-SIIS). PADOH providers are strongly encouraged to join PA-SIIS to ensure a smooth transition of placing PADOH supplied vaccine orders electronically.

Beginning March 1, 2013 all PADOH supplied vaccine orders must be placed electronically through the PA-SIIS electronic application. Provider orders will still be reviewed by the PADOH staff and then electronically uploaded to the new ordering system called Vaccine Tracking System or VTrckS through the PA-SIIS application. The only exceptions are those providers who do not have internet (online) capabilities; the PADOH will accept faxed, mailed or online orders from providers with no internet connection.

The following attachments in this section are provided by PA-SIIS to assist providers with online ordering.
